Sociology

Chair, Department of Sociology: Associate Professor A. Lewellyn Jones

Coordinator, Anthropology Program: Professor Bolin

Professors: Arcaro, Basirico, T. Henricks

Assistant Professors: Curry, K. Jones, Mould, Peeks, Peloquin

Sociology and anthropology provide the student with an exceptional understanding of the world by developing an awareness of how society and culture shape our lives and perspectives. Studying sociology and anthropology is more like a journey in which we learn to stand outside ourselves to see our world with new eyes.

Sociologists and anthropologists study all forms and dimensions of human social and cultural behavior from the institutional to the interpersonal e.g., “How do people select a mate? How are people organized into groups such as sororities, fraternities and sports teams? How do institutions such as the family, economy, government, religion and health-care develop and affect our lives?”

With their wide scope, sociology and anthropology are linked to all the disciplines and are complementary to any major found at Elon. The U.S. is a culturally diverse society and solutions to our interpersonal, community, national and international problems demand an understanding of society and culture.

The sociocultural perspective students develop through sociology and anthropology is an asset not only in their personal lives, but also in business, politics, economics, health-care, education, health and fitness, social services, the mental health field, urban planning, family planning and many other professions.

A major in Sociology requires the following courses:

The complementary relationship between qualitative and quantitative research methods will be considered, with a sustained focus on the particular strengths and weaknesses of qualitative research design. Prerequisite: SOC 111 or ANT 112. Cross-listed with ANT 215.

Specific topics include: discussion of the scientific method, survey methodology, sampling techniques, hypothesis testing, aggregate level analyses, and issues of reliability, validity and generalizability, as well as data analysis with SPSS. The complementary relationship between quantitative and qualitative research designs will be considered, with a focus on the strengths and weaknesses of quantitative research design. - SOC 262. CONTEMPORARY SOCIAL THEORY** 4 sh
 This course will explore how current social conditions and new social movements have prompted a rich, lively process of critical re-engagement and even rejection of the “classics” of sociological theory. Students will consider how contemporary politics of identity and difference as well as scientific challenges to the nature-culture dichotomy catalyze deep reflection on the perennial issues of social theory: the possibility of social order, the dynamics of social change and the relationship between the individual and society. Consequently, limitations of the classics to explain contemporary social realities will be uncovered. Furthermore, course materials will challenge students to identify the alternative axes of theoretical dispute in sociology as well as to question the contributions and consequences of social scientific knowledge.
