Elon University: A Learning Community

By embracing the distinct intellectual heritages of the arts and sciences – mathematics and the natural sciences, the social and behavioral sciences, the humanities, and the arts – and sustaining premier professional programs in business, communications and education, Elon has formed a vibrant learning community.

At Elon, we believe the single most important aspect of a quality education is the direct, personal interaction between a professor and a student. When combined with Elon’s strong commitment to study abroad, leadership, service learning, internships and undergraduate research, these encounters open the minds of students and professors, and transform the way they view the world. The relationships that develop among students and faculty – in exchanging ideas, testing hypotheses, conducting research, and constructing knowledge – are the cornerstone of Elon’s collaborative learning community.

The liberal arts and sciences experience at Elon fosters intellectual curiosity, helps students learn to think critically and analytically, improves students’ ability to communicate, awakens a joy and passion for learning, and teaches students to be informed and responsible citizens.

CELEBRATE! 2007 brings together the stimulation of scholarly pursuit with the exhilaration of creative expression. While CELEBRATE! is a special week recognizing student achievements in academics and the arts, Elon offers many events throughout the year. The cultural calendar and speaker resources calendar provide a month-by-month overview of guest and faculty lectures, musical recitals, art exhibitions, theatrical performances, and special events. For a preview of what’s coming be sure to visit the web page at http://www.elon.edu/e-web/news/cultural_events/.
