Elon College Fellows is a four-year program for students who are passionately committed to the breadth, depth and interesting connections within the Arts and Sciences. Fellows classes, an annual scholarship, a travel grant, research funding, events and mentoring are just some of the benefits of being an Elon College Fellow. Junior and senior Fellows engage in a two-year research apprenticeship with a faculty member. There are currently approximately 200 Elon College Fellows. While the accomplishments of each year are significant, the accomplishments below represent those of our most recent graduates — the Class of 2014.

Profile of the Elon College Fellows Class of 2014

» 38 College Fellows graduated in 2014 representing 12 academic departments. 18% had double majors, and one fellow had an independent major in social innovation.

» 68% had at least one study abroad or study away experience in locations including France, Italy, Greece, Ghana, India, Peru, Belize, Spain, India and Great Britain.

» 40% enrolled in one or more courses of world languages above the 122 level or started a new language.

» 50% completed an internship, co-op or practicum experience.

» 100% did a two year research experience in the major.

» Examples of research topics include: “Female Voice in Short Fiction” (Lindsey Olsson majoring in English, Creative Writing); “A comparison of Seed longevity of Eastern Tree Species in Seeds of Varying Ages” (Jillian Pieciak majoring in Biology); “Manifestations of Mapuch Resistance in Contemporary Chile” (Mackenzie Mann majoring in International Studies); “Animal Activists and Service-Oriented Nuns” (Brett Evans majoring in Religious Studies).

» 100% did a professional presentation or performance of their research.

» 39% participated in Elon’s Summer Undergraduate Research Experience.

» Nearly 90% presented their work at Elon’s Spring Undergraduate Research Forum.

» A number of fellows in the Arts and Humanities held special venues to present and discuss their creative projects.

» 29% presented their work at the National Conference for Undergraduate Research.

» 6 of the 2014 cohort were Lumen Scholars.

» 24% of the students inducted into Phi Beta Kappa in April 2014 were Elon College Fellows.

» Positions reported by the 2014 fellows include: Teaching for Teach for America, Columbia Publishing Co., statistician, research assistant at the Harvard Kennedy School of Government and research assistant at the Tufts Veterinary School.

» Immediate post-graduate studies reported by 2014 fellows include Ph.D. in Electrical Engineering at Yale University, physician assistant program, University of Maryland School of Medicine and NC State MFA poetry program.
