The Legend of the Elon University Phoenix

Throughout history there is told the legend of the rare and remarkable Phoenix, a crimson and gold bird that lived 500 years. It was sleek, swift and strong - the most marvelous bird ever created by human imagination. At the end of its life, with death approaching, it built a nest in an oak tree and was consumed in flames ignited by the sun. From the ashes emerged the next Phoenix - reborn and renewed, with strength forged in fire.

Fire, too, has shaped the history of Elon University. The disastrous fire of 1923 all but destroyed Elon. Gone were Main building, college records, classrooms, the library and chapel. But within days of the fire, Elon trustees set in motion the plan for Elon to rise from the ashes, stronger than ever.

The Phoenix is a powerful leader and an emblem of immortality. It is a perfect symbol for a school that is constantly renewing and re-creating itself.

The Elon motto, Numen Lumen, embraces intellectual and spiritual light. And so too, throughout history, the Phoenix has served as a symbol of light and knowledge.

The Phoenix is timeless and unique. It perfectly describes an athletics program and an institution that are rising to new levels of excellence.

There is only one Phoenix. There is only one Elon. Catch the fire!
