Submission Guidelines for Book Recommendations

Select an environmentally related book published within the last five years. Select books published outside of this time period may be suitable.

Content

- A good review should tell the reader what the book is about, whether or not the author is successful in his/her intent, and why the book should be read. The review should be an involved and informed response to the book’s style, structure, theme, and content.
- If you find nothing redeeming about a book, don’t review it. We are not looking for completely negative reviews, but rather an honest assessment backed up with evidence.
- A brief synopsis of the book.
- Main themes of the book.
- Quotes that highlight the strengths and highpoints of the book.

Format

- Submissions should be approximately 750-1,000 words.
- Follow the most recent Modern Language Association documentation guidelines.
- At the top of the first page, include the following information:
  1. Title of book (include subtitle, if any)
  2. Author/editor/translator/illustrator/photographer
  3. Publishing house and publication year
  4. Price (indicate hardcover or paperback)
  5. ISBN
  6. Number of pages

Please send inquiries and interest notification to visionsmagazine@elon.edu and include the type of submission in the subject box. All submissions are due before the February deadline.
