Curriculum

- The Periclean Scholars Class of 2011 received a $5,000 grant from the American Cultural Center run by the U.S. Embassy in Sri Lanka. The funds were used to host a national conference to raise awareness of environmental issues in Sri Lanka.

Research

- Two students received $1,000 scholarships as the inaugural cohort of Sustainability Research Scholars. The program, funded by the Class of 2010’s gift, awards scholarships on a competitive basis to students doing research related to sustainability at Elon.

Co-Curricular

- Campus Kitchen at Elon University was launched, which collects unused and unserved food from community partners, including Elon Dining Services, and engages students, faculty and staff as volunteers to prepare and deliver the meals to those in need in the local community.

Operations

- The Alumni Field House received LEED Gold certification from the U.S. Green Building Council.

- The Elon University Forest was created dedicating 56 acres as a land and nature preserve.

- Composting operations were expanded to Octagon in the Moseley Center. This location requires students, and other patrons of Octagon, to sort their waste for the appropriate bin.
