A NEWSLETTER FOR THE EMPLOYEES AND FRIENDS OF ELON UNIVERSITY SEPTEMBER 2002

E-PEOPLE

Service with a smile

By Jennifer Oglesby '03

Kathy Manning knew there was something unique about Elon students long before she began her position as director of service learning.

“When I was working for Habitat for Humanity International, I kept running into volunteers who attended Elon. They all had, among many other things, really good leadership skills. It made me wonder what was going on at Elon that made them turn out like they did,” Manning says.

After working with Elon students firsthand for three years, Manning has decided those skills are a result of the opportunities Elon gives its students. Those opportunities include experience in the services Manning is now in charge of, such as Special Olympics, blood drives and course-linked service learning.

“Elon is not afraid for students to have ideas and run with them. For example, my department is run by a staff of 50 students who have volunteered to organize events and keep things running. Without them, there would not be a service learning department,” she says.

Defining moments

Manning was heavily involved in service learning when she was a student at Villanova University, earning a degree in international business. She always knew she wanted to be involved in service after school, but the defining moment was when she spent a week in a soup kitchen in inner-city Philadelphia.

“To make friends with people who are in that situation is hard, and I knew right then I couldn't ignore people who were living like that,” she says.

Manning does acknowledge there are times when students have some difficulty adjusting to the emotional stress that comes with volunteering and serving others.

“The most important thing is to help students process the experience. If they walk away not learning the right thing, then I want to help them to do so. If they take it purely from the surface and don't get enough of the right information, then they won't look on it as a good experience. I think that's the key for them and the connection to service,” she says.

Kathy Manning (right) and Lindsay Reed, student coordinator of Elon Volunteers!, share a laugh during a summer visit to a Habitat for Humanity site.

Manning says her favorite part of working with students is watching them go through the experience of helping others.

“I love seeing how passionate and dedicated students become when they see the benefits of serving others. Each student will take away something different from the experience. I like watching what it is they take away,” says Manning.

Opportunities for growth

The coming year will bring some new opportunities in the Kernodle Center for Service Learning. During spring break, a handful of lucky Elon volunteers will travel to the Dominican Republic to work on a Habitat for Humanity project. Manning says the experience is designed to help expose students to new cultures and issues. She also says she hopes to extend the service learning program, in which Elon faculty add service components to their courses, such as having students tutor local school children to enhance their reading skills. This adds a practical experience to what the Elon students are learning in the classroom.

Manning encourages members of the Elon community who are thinking about volunteering to stop by the office (Moseley 230) to find an experience that is right for them.

“Service is a really powerful opportunity to enhance learning, whether it's connected to school or not,” she says. “What I learned from college, I took from service experiences.”

Celebrating Diversity: The Office of Multicultural Affairs

By Katie Beaver '03

L'Tanya Richmond is excited.

As director of multicultural affairs, Richmond is overseeing several significant changes in the structure and output of her office, including a name change, a staff addition and a move to better office space.

“We’re doing new things, we’re going to have a home of our own and we’re going to stand out,” she says enthusiastically. “It’s exciting!”

Formerly known as the Office of Minority Affairs, the office was renamed Aug. 1 to reflect Richmond’s main goal for this year: serving as a support and resource office for all multi-ethnic students while fostering student retention and a greater understanding of diversity.

“We changed the name in an effort to serve the entire campus,” Richmond says. “All students need to begin to talk about diversity.”

Once housed in Moseley 213, the Office of Minority Affairs moved twice during the summer, finally ending up Moseley 221B. A new staff position was added to include a graduate-student assistant, **La’Kicia Fuller**. Richmond believes these changes will benefit the office, both now and in the future.

“Having a home of our own will help us form our own identity,” Richmond says, indicating that she previously shared office space with Residence Life. “We will be visible to students, faculty and staff, and we will be better able to work with all the students on campus.”

Led by L'Tanya Richmond, the Office of Multicultural Affairs is located in Moseley 221B.

Richmond’s role has expanded in the past few years with Elon’s growing number of multi-ethnic students, including Asian Americans, Native Americans and Hispanic Americans. Richmond estimates there are nine programs run through the office now, in addition to 12 campus organizations that foster African-American culture. While most current programs are targeted toward African-American students, she says she hopes to change that soon.

Richmond says she believes the programs the Office of Multicultural Affairs offers during orientation and freshman year are essential. One such program, Student Mentors Advising Rising Talent (SMART), provides every incoming minority freshman with a minority student mentor. Freshmen meet their mentors at SMART orientation, where they learn about the other programs and services available to them.

“Through these programs, the students feel embraced and welcomed,” Richmond says. “They feel like they’re not the only ones here. The people in these programs are wonderful support agents.”

Richmond constantly fields calls from other colleges and universities looking for advice on multicultural affairs. She has a ready reply.

“There are three steps to multicultural education,” Richmond says. “The first is to understand—bring it to the table and talk about it. The second is to appreciate, and through appreciation, to finally be able to celebrate diversity.”

LaToya Marcus '04 and L'Tanya Richmond take a break in the African-American Resource Room.

Bill Bardin, director of corporate relations

Bill received his bachelor's degree in business administration from the University of North Carolina at Chapel Hill. Before coming to Elon, he worked with Wachovia Corp., General Electric and Glen Raven, Inc.

Bill says he was attracted to the university by "Elon's vision and focus on engaged learning, the NewCentury@Elon strategic plan and the Koury Business Center expansion." He says the last book he read was "Elon College: Its History and Traditions," by Durward T. Stokes.

In his free time, Bill spends time with his wife, Patricia, and children, David, Anne and Margaret.

Kate Colussy-Estes, assistant chaplain and director of religious life

An Atlanta native, Kate became interested in Elon because of its "location, commitment to community and quality of education."

The former chaplain intern at Schreiner University earned her bachelor's degree from Eckerd College and her master of divinity degree from Louisville Presbyterian Theological Seminary.

Kate stays busy at home with her husband, Justin, and two cats, Smooch and Valentine. For fun, she likes to go to movies and spend time with her family and friends.

Kate's favorite meal is a family recipe for chicken cacciatore, which her family enjoys on Christmas Eve.

Dianne Ford, coordinator of serials and government documents

Dianne, who works with periodicals and documents in Belk Library, received her bachelor's degree from Wake Forest University and her master's degree from the University of North Carolina at Greensboro.

She recently read "The Night Listener," by Armistead Maupin. She says her other hobbies include, "spending time outdoors—

gardening, hiking and swimming." She is a member of the North Carolina Botanical Garden.

In her spare time, Dianne also enjoys spending time with her husband, Neal Jones, her son, Able, and her daughter, Emma. Dianne doesn't have to go far to find her daughter—Emma works as a study abroad and international student advisor in the Isabella Cannon Centre.

Neal Byrd, carpenter

Neal joins the Elon community after 17 years as a drywall subcontractor. The Yanceyville native earned his associate's degree from Alamance Community College. He has been a volunteer with the Anderson Fire Department for the past five years.

Neal enjoys spending time with his wife, Nancy, and 5-year-old son, Zachary. "I coach my son's Little League ball team," Neal says. The family has two golden retrievers, Copper and Ginger.

Neal's hobbies include hunting and fishing. He also likes a good pizza and enjoys listening to classic rock.

Mitch Dimont, electrical mechanic

Previously employed by GKN Automotive and the Iomega Corporation, Mitch is an Alamance County volunteer firefighter for station No. 12.

When he's not busy working, Mitch can be found watching NASCAR races, boating or camping. He recently finished reading "Driver #8," a chronicle of Dale Earnhardt Jr.'s rookie season in NASCAR Winston Cup.

Mitch and his wife, Kathy, have two daughters, 15-year-old Ashley and 12-year-old Gabrielle. Four dogs and one cat round out their family.

Jay Harper, bursar

A native of Emporia, Va., Jay earned his bachelor's degree in business administration from Elon in 1994. "I enjoy being back on a great campus in a great atmosphere," he says.

When he is not at work, Jay enjoys spending time with his family and friends. "The most gratifying moment of my life was the birth of my son," Jay says. He and his wife, Susan, are the proud parents of two-year-old Pearson.

Jay enjoys visiting waterfalls, hiking, rock climbing and water skiing. He describes his musical taste as very eclectic. "I like almost any type," he says.

Wayne Thompson, physical plant buyer

A Burlington native, Wayne describes himself as an outgoing person who never meets a stranger. The 30-year Navy veteran is a member of the Veterans of Foreign Wars and the American Legion.

When Wayne is not working, he enjoys boating, fishing and other outdoor activities.

The father of five sons—Dan, Shawn, Richard, Pat and Justin—Wayne says that the most gratifying part of his life is "watching my kids grow into adults."

Jan Holden, media services clerk

"I was offered the opportunity to work here, and I knew it was an environment I'd like," Jan says about coming to Elon.

During the day, Jan can be found in Belk 101, keeping things running smoothly as media services clerk. Her duties include administrative responsibilities, coordinating the office and assisting students. "I enjoy working with the students very much," Jan

says.

Jan spends her free time with her cocker spaniel, Lucky. She also enjoys golf, tennis, swimming and other water sports.

Jan lived in Iran for 18 months while the company her husband worked for improved telephone service in the country. During that time, she worked in a real estate office dealing mainly with the company's American clients.

Allison Ragon, assistant director of residence life—north area

Why did Allison come to Elon? "I was looking for a smaller school that was student-centered—and filled my desire to avoid long, cold, winters," she says. "I also fell in love with the South after attending UNCW and wanted to be closer to my family."

After receiving her bachelor's degree in middle grades education from the University of North Carolina at Wilmington, Allison earned her master's degree in higher education student affairs administration from Indiana University. Allison says her most gratifying moment was "walking across the stage to receive my master's hood in May!"

Allison enjoys hiking, swimming, biking and running in her spare time. "I really enjoy the mountains and the beach, so I try to see both as often as possible," she says.

Doug Searcy, director of residence life

Doug, who came from Gardner-Webb University, was attracted to Elon by the success of the institution and the community atmosphere. He received a bachelor's degree in English and communications from Mars Hill College and a master's degree in student personnel services from the University of South Carolina.

In his spare time, Doug enjoys spending time with his wife, Beth, and their children, 6-month-old Caroline and 3-year-old Carter.

"I love to travel," Doug says. His travels include a trip to Africa, where he visited Kenya and Tanzania. "An international experience changes a person," he says. "I learned that people are more alike than different. A study abroad experience can be a powerful element in a student's development."

Scott Windham, director of language media center and instructor of German

A former consultant for an e-learning services company, Scott was attracted to Elon by the facilities and the improving reputation and standings of the university. He received his bachelor's degree from Davidson College and his doctorate from the University of North Carolina at Chapel Hill.

Scott says he finds it gratifying to take stock of the good things in his life on a daily basis, such as his wife, Laura, and their two cats.

For fun, Scott enjoys most sports, movies, gardening, wood-working and travel. "I once guided a raft through a series of rapids in the Grand Canyon," he says.

As for his taste in music, Scott says, "You name it, I like it, except for Barry Manilow and Barbara Streisand!"

Niki Turley, associate director of residence life operations and information management

Niki was drawn to Elon by the principles of the university, the area and the fact that her husband is pursuing a Ph.D. in biblical studies in North Carolina. Previously employed by Emmanuel College in Boston, she received her bachelor's degree in political science from Valdosta State University and her master's

degree in psychology from Palm Beach Atlantic College.

The most gratifying moment of Niki's life was getting married to her husband, Bryan.

Her hobbies include tennis, listening to classic rock and traveling. The interest in traveling stems from trips she took with her parents as a child. "My parents were in the State Department—foreign service—so we traveled around the world," she says.

Christopher Troxler, personal counselor

Christopher joins the Elon community after working in private practice. The Greensboro native says he was attracted to the university by "the students and the sense of institutional development." He received a master's degree in clinical psychology from Sonoma State University and a master's degree in English literature from the University of California at Berkeley.

Christopher enjoys hiking, learning about natural history, playing the guitar and listening to jazz from the 1920s and '30s. He also enjoys spending time with his wife, Kathryn, and daughters, Susanna and Syrena. The family also has two pets—an elderly dog, Lena, and Mr. Cat, an "uppity" feline.

WHO'S NEW

Faith Shearer, senior woman administrator

An Indianapolis native, Faith says she decided to come to Elon because she was "attracted to the area as well as the people."

Faith received her bachelor's degree in economics from Smith College. She also takes pride in the master's degree in organization development and human resources that she earned from Johns Hopkins University. "It was a long, hard process that took me three years at night," she says.

In her spare time, Faith enjoys photography, and she recently finished reading "Ice Bound," by Dr. Jerri Nielsen.

Jeff Stein, assistant dean of students

Jeff first heard about Elon while at Beloit College in Wisconsin. "The more I learned, the more excited I was about the creative action across campus," Jeff says. "The opportunity to work with Service Learning, Residence Life and teach in the English department created too many opportunities to say no to."

The Denver native received his bachelor's degree in creative writing and literary studies from Beloit College. He also received a master's degree in English from the University of Northern Colorado and a master's degree in creative writing from Colorado State University.

Jeff and his wife, Chrissy, have two children: Lena, 3, and 20-month-old Ben. They are slowly adjusting to life in North Carolina. "I'm still trying to get my system used to sweet tea," Jeff says.

FOR YOUR BENEFIT

Elon expands wellness program

The Office of Human Resources welcomes Janie Griffin, R.N., to the Elon team. Griffin, an occupational health nurse with Alamance Regional Medical Center, will be coordinating Elon's employee wellness program this year.

Starting this fall, the wellness program will include not only educational programs but also screening for cholesterol and glucose. In addition, with support from Janie, faculty and staff will be able to develop individualized plans for maintaining or improving healthy lifestyles.

"I am excited about meeting faculty and staff and assisting those of you interested in achieving personal wellness goals," Griffin says. Here is a glimpse of some of the programs faculty and staff can expect to see over the next year:

L.I.F.E. Program

The Life Incentives Fitness and Exercise program will begin in September for all interested faculty and staff. This popular eight-month program includes specific educational offerings on exercise, nutrition and cholesterol as well as incentives for exercise and the reduction of your cardiovascular risks.

FREE Health Screenings

All faculty and staff may have a free screening for the following:

- Total Cholesterol
- Low Density Lipids (LDL)
- High Density Lipids (HDL)
- Glucose (sugar)
- Triglycerides
- Blood Pressure
- Height and Weight
- Body Mass Index

Screenings will take place at different locations on campus. The schedule will be posted and sent out by e-mail.

Personal Health Profile and Individual Health Plan Development

In addition to the screenings and educational programs offered as part of the employee wellness program, all faculty and staff will be able to complete a personal health profile. Personal and family health history information will be compiled to assess risk factors for such conditions as heart disease, stroke, diabetes and cancer.

This confidential assessment tool will be offered online through the Elon Human Resources Web site as well as in hard copy form. Once the personal health profile has been completed, Griffin will provide individualized health counseling and help develop plans to assist faculty and staff in making the lifestyle changes necessary to improve/maintain health.

Lunch and Learn Educational Programs

Want to learn more about the hidden fats in foods? Interested in increasing your muscle mass? Want to find out about common conditions and diseases for your gender? These programs will teach you how to improve your health over your lunch hour! The first program, "Rev Up Your Metabolism," is scheduled for Oct. 4 from noon to 1 p.m. in McKinnon Hall, Room F.

Have ideas or questions?

If you have questions about Elon's wellness program, contact Janie Griffin at ext. 5561 or jgriffin@elon.edu.

Andy Angyal, professor of English, completed the two-year Lay Ministry program for the Diocese of Charlotte and took part in the installation service at St. Gabriel's Church in Charlotte on Saturday, April 27. Angyal gave a reading of his nature poetry at the second annual Writers' Conference and Workshop in honor of Rachel Carson, held June 11-14 in Boothbay Harbor, Maine. In addition, Angyal will be included in an upcoming television documentary about short stories of Wendell Berry.

Jim Barbour (left), associate professor of economics, and **Nim Batchelor** (right), associate professor of philosophy, presented their work on teaching economic justice at the 2002 conference of the European Allied Business

Association in Rothenburg ob der Tauber, Germany. Barbour and Batchelor presented a paper titled "Reflections on the Preparation and Execution of a Course in Economic Justice." Barbour also gave a presentation titled "Journaling and Learning: Does the Medium Matter?" in a continuing session dedicated to pedagogical issues.

Pranab Das, associate professor of physics, presented a program at the Institute on Religion in An Age of Science's 49th annual retreat July 27-Aug. 3 in Star Island, N.H. His presentation examined the relationship between free will and determinism in the context of science and mechanism. Das will travel to Almaty, Kazakhstan, to speak to a UNESCO-sponsored meeting Sept. 19-20.

Tom Erdmann, associate professor of music, had his article on Dave Koz published in the July/August 2002 issue of Saxophone Journal. Erdmann also wrote an article for the June 2002 issue of the International Trumpet Guild journal titled "An Interview with Irvin Mayfield." The same issue of the journal included a review of Erdmann's first book, "An Annotated Bibliography and Guide to the Published Music of Sigmund Hering." The review praised Erdmann's book as "the first detailed examination of Hering's work."

Bea Sanford (left), director of planned giving, made a presentation titled "Building a Premier Planned Giving Program" on May 13 to the Dan River Regional Chapter of the Association of Fundraising Professionals in Danville, Va.

Vickie Somers (right), director of auxiliary services, attended the National Association of College Auxiliary Services' South region meeting April 28-May 1.

Barth Strempek (left), associate professor of business administration, was elected to the Board of Directors of the Piedmont Entrepreneurs network. The network is a group of approximately 200 entrepreneurs and support people who promote entrepreneurship in the Triad.

John Sullivan (above right), Powell Professor of Philosophy, gave a presentation at the Boeing Leadership Center in St. Louis on Aug. 13. His presentation was titled "Moving Between Two Worlds: At the Intersection Between Existing and Emerging Cultural Paradigms."

Laura Roselle (left), associate professor of political science, delivered the commencement address at Greensboro Middle College, an alternative school in Guilford County, on May 30.

Mark Fox (right), adjunct instructor in the School of Communications, gave two workshops at the 2002 North Carolinians for Home Education convention May 24 in Winston-Salem. The workshops were titled "Who's Afraid of Speaking?" and "The Man for the Job."

Byung Lee (left), associate professor of communications, and **Janna Anderson** (right), director of Internet projects for the School of Communications, had an article published in *Operant Subjectivity*, the journal of the International Society for the Scientific Study of Subjectivity. The article, titled "An Analysis of Internet Adopters," employs Q methodology to classify Internet users and explore the extent of their Internet usage. Q methodology interprets subjective behavior without the usual biases of structured survey questionnaires.

Maurice Levesque, associate professor of psychology, and Mark Zrull, a psychology faculty member at Appalachian State University, teamed up to give a presentation titled "Undergraduate Research Programs: Different Approaches to Achieving the Same Goal" at the Council on Undergraduate Research national conference. The conference was held in June at Connecticut College.

Clyde Ellis, associate professor of history, delivered the address at commencement ceremonies for the department of history at the University of North Carolina at Greensboro on May 18.

Bottles, rattles and cute little socks. Lullabies, laughter and alphabet blocks. Congratulations to several faculty and staff members on their new additions to the Elon community.

Amy Hadwin, human resources assistant, and her husband, Wayne, welcomed a new daughter to the family. Alyssea Quinn Hadwin was born May 1.

Tom McCarthy, assistant professor of history, and his wife, Lisa, had a boy. Thomas Noble McCarthy was born on May 10.

Paul Miller, assistant professor of sports medicine, and his wife, Jamie, were blessed with a baby girl. Sophie Ilana Miller was born May 20.

KerryAnn Matthew, project manager for the construction department, gave birth to a bouncing baby boy, Christopher Kevon Walker, on June 4.

Art Fadde, director of graduate admissions, and his wife, Shelley, welcomed their daughter, Emma Frey Fadde, on August 4.

Brant Touchette, assistant professor of biology, and his wife, Teresa, were blessed with a son, Roman James Touchette, on August 9.

Stephanie Page, assistant director of human resources, and her husband, Alan, are the proud parents of a baby boy. Wesley Alan Page was born on August 11.

Lisa Beuerle, mathematics instructor, and **Jim Beuerle**, assistant professor of mathematics, welcomed their baby girl, Lauren Paige Beuerle, on August 23.
