September 2001 Issue

Your @Elon newsletter has a new look for the new school year! We hope you enjoy this month's features. Be sure to check out our photos from the Aug. 21 [faculty/staff picnic](#).

E-PEOPLE

Bruce Nelson

brings counseling expertise -- and a love of books -- to Elon. Check out his new office in the R.N. Ellington Health and Counseling Center.

IN THE SPOTLIGHT

Rhodes Stadium

Elon students won't be the only fans cheering on the Phoenix this fall. Many faculty and staff members are looking forward to the upcoming excitement on campus. Find out what head football coach Al Seagraves has to say about the first game in Rhodes Stadium.

UPCOMING EVENTS

A Fantastic Fall

From speakers to Shakespeare, Elon has many [exciting cultural events](#) to choose from this fall.

FOR YOUR BENEFIT

With these helpful Web sites, you can surf your way to [important benefit information](#).

WHO'S NEW

Which new staff member has eight cats? Who has yet to acquire a taste for grits? Get to know some of your [newest colleagues](#).

CONTACT US

The @Elon newsletter is published online nine times per year (February, March, April, May, June, September, October, November and December). The purpose of @Elon is to build community by providing news for the faculty and staff of Elon University.

If you have faculty/staff news to share, please e-mail [David Hibbard](#) in the News Bureau. We welcome your comments and suggestions. Please send these to [Mandy Dixon](#), editor of @Elon. Visit our [Contact Us](#) page for a complete listing of @Elon staff.

NEWS & NOTES

Find out what your [fellow faculty and staff members](#) have been up to lately! We answer questions such as these:

- Who was quoted in an Arizona Republic article about family reunions?
- Who will serve a three-year term on the board of directors of the North Carolina Sports Hall of Fame?
- Who presented a paper at the annual meeting of the Psychological Society of America?

PAST ISSUES OF @ELON

Printing @Elon in [PDF](#) format (using Adobe's Acrobat Reader) is easy! If you do not have this plug-in on your computer, just click on the logo at the right and follow the instructions. Once you have Acrobat Reader installed, just click on the issue below and print the PDF.

E-PEOPLE

This issue's E-people feature focuses on Bruce Nelson, Elon's director of counseling.

By Jennifer Guarino '03

When Bruce Nelson arrived on campus to interview for the director of counseling position last April, he was won over immediately by the people and atmosphere. He says if he hadn't been hired, he would have considered enrolling as a student.

"I saw Elon as a chance to be in a stimulating environment," Nelson says. From the stack of books on his desk, it looks like he found the right place. "I've found out how easy it is to check out books from the library," he says with a smile. "I have to stay away from Amazon.com and Barnes and Noble. It's hard to get out without buying anything."

Nelson says he is such a book fanatic that his wife, Lauren, has asked him to move some books out of their home, as he has outgrown the bookshelf space. His office in the new R.N. Ellington Health and Counseling Center is lined with them.

Nelson has put his love of reading to good use since he came to Elon. He spent the summer reading and developing standard practices for his staff to use when helping students through difficult situations.

The counseling center specializes in one-on-one service. Students, faculty and staff can walk in or call the center for free, confidential service. The center is open Monday - Friday, 8 a.m. to 5 p.m., and appointments can be made by calling 278-7280.

More than 280 students received counseling last year from the center staff, which includes three part-time counselors and two local support members. Nelson says these students have one thing in common: They come to the counseling center to receive help meeting their clinical needs. The majority of the center's care is short-term oriented, but Nelson says the center has links with community resources to provide long-term care.

"We're working to serve a whole array of problems and needs, anything that affects the lives of students," he says. These include problems with depression, anxiety, self-esteem, relationships, grief and loss, stress, substance abuse and eating disorders, among others.

Elon offers Nelson a new set of challenges. In his last job, he treated at-risk children and adolescents with psychiatric

Nelson, an avid reader, did not have any trouble filling the bookshelves in his new office.

Nelson's office is located in the new R.N. Ellington Health and Counseling Center.

Along with the rest of the staff, Nelson and Jan Dillon, secretary of counseling services, are settling into the new location.

disorders at John Umstead Hospital in Butner, N.C.

"Universities tend to have times when there is more stress than others," he says. "It's not uncommon for us to deal with freshmen with navigational issues." These navigational issues don't involve helping students find their classes. Rather, the center helps new students find their place on campus at a time when roles and support systems are changing.

In addition to dealing with individual issues, the center offers support to the Elon community as a whole. From dealing with "critical incidents that impact the overall emotional health of the community" to providing support to organizations, Nelson and his staff hope to be an important resource to the community. By keeping meticulous records, Nelson wants to better understand Elon's needs. This year, he will track the services his staff provides to help prepare for next year. He also would like to see a support network set up for students dealing with similar problems.

Nelson likes to spend his evenings and weekends outside. He loves outdoor adventures, from mountain biking to cross-country skiing. He has climbed Mt. Rainier and biked the Blue Ridge Parkway. His adventures give him insight that helps him deal with the issues he encounters at work. "I am interested in how people face extraordinary situations and meet those challenges. I see a lot of parallels in outdoor adventures and the office," he says.

Nelson says he is a dreamer and his job is helping other dreamers. "I like working with people trying to realize their dreams," he says. "And whatever gets them stuck, I like to help them through those obstacles."

Just for Fun: Bruce Nelson is an avid reader. Send him an [e-mail](#) to find out which titles are his favorites.

IN THE SPOTLIGHT

This month, we look at a facility that really took shape over the summer -- Rhodes Stadium!

Faculty and staff got their first look at the new facility during a picnic in July.

By David Hibbard, director of news services

This fall, Elon faculty and staff will be able to leave their offices, take a short stroll across campus and attend an Elon football game.

That hasn't been possible for a long, long time. Games have not been played within walking distance of campus since the 1940s, when football was played at Comer Field, located across from the Elon fire station. And only one time, in Elon's first-ever game in 1909, has a football game actually been staged on Elon property. Since 1949, home games were played four miles from campus at Burlington Memorial Stadium. But Rhodes Stadium will change all that starting Sept. 15, when the Phoenix opens its new home with the inaugural game against Eastern Kentucky University.

It seems the new facility at the north end of campus, which has a seating capacity of 8,250, has exceeded nearly everyone's expectations. From the 57-foot bell tower topped by a copper dome, to the main entrance -- an impressive arched, brick-and-stone colonnade with enclosed ticket booths -- the buzz around campus over the summer was about Rhodes Stadium.

With restrooms and concession stands located within a short walk of every seat, the fans' needs were a prime consideration in the stadium's design, says Trip Durham, assistant director of athletics. "If you look at every aspect of this stadium, it's fan-friendly. Regardless of where someone is seated, I think everyone will have a great experience," he says. Seating for faculty and staff will be located in section 103, offering a close-up view of the action. (For ticket information and a stadium diagram, visit the [Rhodes Stadium Web site](#).)

Workers installed bells in the new bell tower on Aug. 29.

McKinnon Field, named in honor of trustee Bob McKinnon '62 and his wife, Ray, will be identical to the playing surface in many NFL stadiums. Work on the field began in the fall of 2000 with the installation of more than 12,000 feet of plastic pipe to assist with drainage. On top of this drainage network came a four-inch blanket of stone, followed by a 12-inch root zone composed of a blend of silica sand and peat moss. In May, this base was graded using laser technology, in preparation for the installation of sod at the end of June.

"I'm sure I'm going to have chills up my spine and tears in my eyes taking the first team in there."

--Head football coach Al Seagraves, on playing the first game at Rhodes Stadium Sept. 15

The Phoenix will have a true home-field advantage with the opening of Rhodes Stadium.

Though Burlington Memorial Stadium served Elon well through the years, Alan White, director of athletics, says the dream of an on-campus

stadium has persisted for many, many years. "The tailgating, the band playing, the whole atmosphere of a football Saturday in the fall will finally be here on campus," he says. "It's something that no matter how hard you try, you can't reproduce off campus."

For head football coach Al Seagraves, the excitement of opening day builds with each practice session. "I'm sure I'm going to have chills up my spine and tears in my eyes taking the first team in there," says Seagraves. "It will be a phenomenal experience."

UPCOMING EVENTS

Want to get a little culture? Check out these great Elon events! Ticket information is listed at the right. For more information about these events, please visit Elon's [Cultural Events Calendar](#).

Thursday, September 6

John McCutcheon in Concert
McCrary Theatre, 7:30 p.m.
Admission by ticket only: \$10 or Elon ID

Sunday, September 9

Mark Nizer's Millennium Vaudeville
Admission by ticket only: \$10 or Elon ID

Tuesday, September 11

Shenandoah Shakespeare Express's *As You Like It*
McCrary Theatre, 7:30 p.m.
Lyceum Series
Admission by ticket only: \$10 or Elon ID

Wednesday, September 12

Shenandoah Shakespeare Express's *Romeo and Juliet*
McCrary Theatre, 7:30 p.m.
Lyceum Series
Admission by ticket only: \$10 or Elon ID

Thursday, September 13

Jacob Hornberger, "Libertarianism and the Drug War"
McCrary Theatre, 7:30 p.m.

Friday, September 14

Forum: A River Runs Through Us
McKinnon Hall, 8:30 a.m. - 5 p.m.

Monday, September 17

Dr. J. Nozipo Maraire, "Reflections on *Zenzele*"
McCrary Theatre, 7:30 p.m.

Wednesday, September 19

David McCullough, "First Principles"
McCrary Theatre, 7:30 p.m.
The Inaugural Baird Pulitzer Prize Lecture
Admission by ticket only: \$10 or Elon ID

Thursday, September 20

The Elon Series on Central and Eastern Europe: Celebrating
Scholarship in Central and Eastern Europe
McCrary Theatre, 4 p.m.

Thursday - Sunday, September 20 - 23

Elon University NAMES Project AIDS Memorial Quilt
Display
Alumni Gym; opening ceremony, 7 p.m. on Thursday; display
open from 9 a.m. - 9 p.m. on Friday and Saturday, and from 1
p.m. - 4 p.m. on Sunday

Friday, September 21

Ticket Information

All tickets for performances in McCrary Theatre and Whitley Auditorium will be available three weeks before the event and may be picked up in the Faith Rockefeller Model Center Box Office between 12:30 and 5 p.m., Monday - Friday. People with Elon identification will receive tickets by showing their Elon ID cards. Seats will be held 15 minutes before performance.

(RS) Indicates reserved seating. Except where so indicated, all tickets are for general seating.

Admission to all programs is free unless otherwise specified. For additional information regarding specific programs, call the campus sponsor of the event or the Office of Cultural Programs.

McCrary Box Office Hours:
12:30 - 5 p.m., Monday - Friday

McCrary Box Office Phone:
336-278-5610

**Black Box Production
Reservations: 336-278-5650**

If you need special assistance for disabilities, please notify the Box Office or the Black Box Reservations staff when you request your tickets.

An Evening of Bel Canto Singing
Whitley Auditorium, 8 p.m.

Sunday, September 23

The Greensboro Symphony Orchestra
McCrary Theatre, 5 p.m.
Admission by ticket only: \$12 and \$18 or Elon ID (RS)

Monday, September 24

The Elon Series on Central and Eastern Europe:
Symposium on Central and Eastern Europe
McCrary Theatre, 7 p.m.

Tuesday, September 25

William D. Phillips, "Almost Absolute Zero: The Story of
Laser Cooling and Trapping"
McCrary Theatre, 6 p.m.
Voices of Discovery Science Speaker Series

Thursday, September 27

Ann Cahill, "Rethinking Rape"
Isabella Cannon Room, 7 p.m.

Friday - Saturday, September 28 - 29

Department of Performing Arts Collage
Yeager Recital Hall, 7 p.m. and 8:15 p.m. on Friday, and 5:30
and 6:45 p.m. on Saturday

Friday, September 28

Jon Metzger Quintet: A CD Release Concert
McCrary Theatre, 8:30 p.m.

Sunday, September 30

The Tom Erdmann/Pat Sullivan Quartet
Yeager Recital Hall, 3 p.m.

**A Newsletter for the
Elon Community**

E-PEOPLE ♦ NEWS ♦ WHO'S NEW ♦ SPOTLIGHT ♦ EVENTS ♦ BENEFITS ♦ BIRTHS ♦ @ELON ♦ CONTACT US

WHO'S NEW

Chances are you saw many new faces on campus over the summer. We asked some new members of the Elon community to tell us a little bit about themselves. (We couldn't fit everyone in this issue, so be sure to check back next month!)

Compiled by Jennifer Guarino '03, Ashley Brown '02 and Tori Braxton '99

Jamie Canada, secretary - health services

Jamie is eagerly awaiting the birth of her first child. Her daughter is due at the end of September, and she and her husband, Eddie, have picked the name Madeline Faith.

Jamie has prior experience working as a medical office technician. Her most recent job was at NovaTech Sciences in Greensboro.

She is excited about working closer to her home in Burlington, which leaves more time for recreational activities, like volleyball and softball. Her other love is reading. Recently, Jamie has read "The Rescue" and "A Walk to Remember" by Nicholas Sparks.

Emily Goetz, assistant director of annual giving and director of reunion giving

Emily got a taste of development as a student at Mary Baldwin College in Staunton, Va. "Working in development since I was a freshman in college is how I got to where I am today," Emily says, adding that she is proud of graduating from college and getting her first job.

She says she is amazed at "how beautiful the campus is and how nice the people are" at Elon. "Everyone I meet seems so hospitable," she says.

Originally from Lynchburg, Va., Emily earned a bachelor's degree in sociology and Asian studies, while also competing on the volleyball team. She enjoys spending time with her friends and family, as well as listening to every type of music from rap to country.

Amy Hadwin, human resources assistant

Amy graduated from Elon in 1998 with a degree in mathematics and is excited to be back. "The community feeling and the sense of purpose to educate today's students for a better tomorrow drew me back to Elon," she says. "I want to be part of making a difference!"

Before coming to Elon, Amy worked as a math teacher at Bartlett Yancey High School, a human resource specialist at Prime Personnel Resources, Inc., and an administrative assistant at Indalex Inc.

Amy says she has found joy in teaching geometry, placing people in great jobs and being there for her family. "My most gratifying moments occur

when a project I've worked hard on becomes a reality," she says.

Amy enjoys all types of crafts, computers, photography and spending time with her husband, Wayne, who graduated from Elon in 1997. The couple has eight cats: Kit Kat, Mittens, Tigger, Callie, Patches, Cougar, Amber and Rudy.

Steven House, dean of Elon College, the College of Arts and Sciences

After living in New Jersey for the last 14 years, Steven and his wife, Patricia, are excited about trying North Carolina foods. They've had Cici's pizza and Lexington barbecue. The couple is always looking for suggestions, but Steven says "I have yet to acquire a taste for grits!"

Steven comes to Elon from Seton Hall University, where he was associate dean of the college of arts and sciences and a biology professor. He says he was attracted to Elon because of its commitment to creating a model of academic excellence. "I am excited about Elon's passion to form an educational model that promotes a relationship between learning and experience, sense and sensibility, fact and value," he says.

He has received several large grants to research the role of blood cells as a determinant of vascular function in health and disease. In his free time, Steven plays tennis, racquetball and golf.

When you visit Steven's office, you'll find that he is always listening to music. His favorites include Jackson Browne, James Taylor and U2. "What I find most disconcerting is that the music I enjoy now is 'elevator music.' I guess I have become my father," he says.

Fiona MacPherson, assistant volleyball coach

When Fiona graduated from Elon in 1999, she began working as a marketing coordinator with Sevista Technologies. Less than two years later, Elon was looking for an assistant volleyball coach, and Fiona returned to coach the team that she once played for. "I've always wanted to coach, and I got the opportunity to come back to Elon," says Fiona, who was the first Elon athlete to be honored with a national player of the week award at the NCAA Division II level.

Originally from West Palm Beach, Fla., Fiona loves to travel. Her travels have taken her to Europe, Canada and Costa Rica. Her favorite destination? London!

David Magee, director of the Elon Career Center

David brings years of experience as a consultant to his new role as director of the Elon Career Center.

He and his wife, Janice, have a son, David, 14, and three grown daughters, Heather, Laura and Bonnie. David enjoys traveling to the mountains or the coast, as well as camping, photography and canoeing.

David has a doctorate in higher education and a master's in counseling. He is currently a member of the Alamance County Chamber of Commerce and the National Association of Colleges and Employers.

Julie Ollis, assistant director of residence life operations and information management

Julie has always been interested in working in a school environment. "I didn't care if it was elementary, high school or college. I really wanted to work with schools," says Julie, a Burlington native. She worked at Elon Elementary School as an administrative assistant before joining the university.

Julie has a degree in textile management from North Carolina State University. She and her husband, Gary, were married in January 2000, and they are members of Macedonia Lutheran Church.

She enjoys water sports, especially skiing, boating and fishing. When she isn't on the water, Julie enjoys reading, and she has read all four Harry Potter books. "I saw the kids reading them and talking about them, so I decided that I had to read them," she says.

Tiffany Pelletier, assistant director of residence life, East area

Tiffany is no stranger to the atmosphere of a university campus. She came to Elon from Western Illinois University, where she was program adviser for the bureau of cultural affairs. She holds a master's degree in college student personnel from Western Illinois, and she received her bachelor's degree in speech communication from Central Missouri State University.

A native of Caribou, Maine, Tiffany was lured south by Elon's campus and sense of community. She enjoys sports, going to concerts and reading. The last book she read was "Bridget Jones: The Edge of Reason."

The mellow jazz music Tiffany enjoys certainly doesn't reflect her outgoing personality. Her friends cite her sense of humor as one of her most charming qualities.

Lisa Ratliff Roper, assistant director of alumni and parent relations

Lisa, the new assistant director of alumni and parent relations, says people think she looks like student life secretary Janice Ratliff. "Contrary to popular belief, Janice is my sister-in-law, not my mother!" she says.

Lisa graduated from Elon in 1993 with a degree in human services. Her husband, Tony, graduated from Elon in 1990. The couple has a 12-year-old son, Quintin, and an 8-year-old daughter, Quierra.

Lisa has six brothers who are older than she is...a good bit older! "I'm 12 years younger than my youngest brother and 25 years younger than my oldest," she says.

Lisa enjoys singing, surfing the Internet, reading and "any meal with cheese!" She also serves as the scholarship fundraising chair for the Burlington Alumnae Chapter of Delta Sigma Theta sorority.

J.R. Shortall, Web technologies programmer

J.R. loves hockey. Even his cats -- Gretzky and Gordie -- are named after hockey players. As a student at Elon, J.R. was president of the roller hockey club, and he now serves as league commissioner for the Atlantic Collegiate Roller Hockey Association, handling the day-to-day operations of the league.

When he's not playing hockey, J.R. enjoys designing Web sites and researching Web development and applications. He received a degree in computer science from Elon last May. As a student, he worked in university relations and information systems.

Robin Wood, accounting assistant

After almost 24 years with General Dynamics, it was "the location, the beauty of the campus and the benefits" that brought Robin to Elon.

A graduate of Cummings High School, Robin enjoys a variety of activities -- boating, fishing, gardening and sewing. Just as varied are her musical tastes. She could have the radio tuned to classic rock, country or even classical. "I would get tired of listening to the same old thing," she says.

Without hesitation, Robin says that becoming a mother was her most gratifying life experience. Be sure to look for Robin in the stands of Rhodes Stadium this football season; she'll be there cheering on her son, Patrick, who is a sophomore wide receiver for the Phoenix. Robin lives in Burlington with her husband, James, and daughter, Natalie.

Brooke Woolston, assistant director of residence life, West area

Brooke came to Elon in search of warmer weather. A native of Colton, N.Y., Brooke says, "I am tired of the snow and ice storms, although I am sure I will miss them come Christmas!"

Brooke joins the residence life staff as West area coordinator. She previously worked as a residence life coordinator at Elmira College in Elmira, N.Y. "I love working with people, especially college students," she says. "We have all been through those times, and it is nice to see others having a positive college experience."

Her favorite activities include going to the movies, shopping, cooking, and visiting friends and family. Brooke says she is known for having a unique laugh. "Some people say it is intoxicating and contagious," she says. "I personally think it is very loud!"

NEWS & NOTES

Do you have faculty/staff news that you'd like to share? Please e-mail [David Hibbard](mailto:David.Hibbard@elon.edu) in the News Bureau with all the details.

Andy Angyal, professor of English, attended the Templeton Foundation's advanced faculty seminar titled "Interpreting Evolution," held June 14-19 at Haverford College, Haverford, Pa. He also attended a conference titled "Reconnecting with the Earth and Elder Wisdom," at the Glen Agape Retreat Center in Oak Ridge, N.C., June 21-23.

Larry Basirico, chair of sociology and anthropology, was quoted in a June 5 Arizona Republic article about family reunions. Basirico discusses the dynamics involved in planning successful family reunions, the ideal length of reunions, and their importance in passing down family heritage and traditions.

Janie Brown, chair of health promotion, leisure and human performance, was recently selected to serve a three-year term on the board of directors of the North Carolina Sports Hall of Fame.

Tom Erdmann, associate professor of music, had his article on jazz keyboardist Rachel Z. published as the cover article in the August/September issue of Jazz Player magazine.

Mike Kingston, assistant professor of biology, presented a paper titled "Vertical Migration of *Euglena viridis* on Scripps Beach, La Jolla, California," at the annual meeting of the Phycological Society of America in Estes Park, Colo., June 28. The paper summarized five days of intensive experimentation in July 2000, examining the behavior of unicellular algae that form green patches on the beach during low tide. This same species of algae forms green patches on stream banks in the Alamance County area during daylight hours in the summer. Kingston's research was sponsored by a grant-in-aid from Elon's Faculty Research and Development Committee.

Jo Watts Williams, special assistant to the president, was honored for 30 years of service to Elon during a portrait unveiling at Maynard House on Aug. 17. The portrait is a gift from her sons, William L. Williams III of Wilmington, N.C., and Randall W. Williams, M.D., of Raleigh. Williams began her career at Elon in 1969 as a faculty member in the department of psychology and education. A 1955 Elon graduate, she has served as special assistant to the president since 1996.

Elon was well represented at the Association of American Colleges and Universities' 11th annual Asheville Institute on General Education, held June 2-6 at the University of North Carolina - Asheville. **Steve Braye**, associate professor of English, served as a team leader. **Tom Henricks**, professor of sociology, **Greg Lilly**, associate professor of economics, **Nancy Midgette**, associate provost, and **Jean Schwind**, associate professor of English, also attended the conference. The Asheville Institute offers teams of faculty and senior academic administrators learning opportunities to make general education programs more effective.

FOR YOUR BENEFIT

Do you have questions about your benefits? This section will help answer them!

New Web Sites Help Explain Benefits

The Office of Human Resources has created a Web site to give you more information on employee benefits, policies, discounts and more. Here's the address:

<http://www.elon.edu/hr/>. Bookmark it today!

If you are enrolled in the Vision Service Plan, you may also want to visit <https://www.vsp.com/> for details on vision benefits. The site has been updated to make it more user-friendly for plan members. On the site, you can find out which doctors are in the plan, get details on your coverage and learn the basics about eye care.

Now you can estimate your Social Security benefits online! This service provides estimates of your retirement benefit at three different ages so you can see the effects of early and delayed retirement. To calculate your Social Security benefits, visit <http://www.ssa.gov/OACT/ANYPIA/>.
