SPN 341. LATIN AMERICAN LITERATURE I: DISCOVERY, CONQUEST, COLONIAL ERA AND INDEPENDENCE 4 sh
This survey course introduces students to the literature of the Spanish-speaking nations of Latin America from the 15th century through the 19th century. Emphasis is on the 300-year period when the Latin American nations were colonies of Spain, and on the 19th century, when these nations freed themselves from Spanish rule, but were still under the literary influence of the mother country. Prerequisite: SPN 320 or permission of instructor. Offered every other year.

SPN 342. LATIN AMERICAN LITERATURE II: FROM MODERNISM TO MAGIC REALISM 4 sh
This survey course introduces students to the rich literature of Latin America in the 20th century. Emphasis is placed on the Modernist movement, major women writers, Pablo Neruda, other Nobel Prize winners and the Magic Realism movement. Prerequisite: SPN 320 or permission of instructor. Offered every other year.

SPN 343. LATIN AMERICAN CIVILIZATION 4 sh
A study of the history, geography and people of Spain from prehistoric times to the present, which emphasizes Spain’s many contributions to Western civilization. Prerequisite: SPN 222 or permission of instructor. Offered every other year.

SPN 344. LATIN AMERICAN LITERATURE III: DISCOVERY, CONQUEST, COLONIAL ERA AND INDEPENDENCE 4 sh
This course examines Latin American geography, history, art, architecture, music, government, economy, ethnicity, languages and culture, including a study of each country. Prerequisite: SPN 222 or permission of instructor. Offered every other year.

SPN 345. LATIN AMERICANS IN THE U.S. 4 sh
This course is an interdisciplinary study of the diversity of the culture, history, and social, economic, and political situation of the Latino population in the United States. We will approach the subject through literature, film and music, through current articles from various disciplines and through direct contact with the local Latino population. This course continues to develop student’s language skills in Spanish. Course conducted in Spanish. Prerequisite: successful completion of SPN 222 or equivalent or instructor’s permission and successful completion of the sophomore writing assessment. Readings in Spanish and English. Offered every other year.

SPN 371-379. SPECIAL TOPICS 4 sh
Topics may include advanced study of language, cinema, selected literary authors, periods, genres or regions. Prerequisite: SPN 222 or permission of instructor.

SPN 415. ADVANCED CONVERSATION FOR RETURNEES 2 sh
Designed for students who have mastered the basic concepts of the language and have spent a term or semester abroad in a Spanish-speaking program. Provides the advanced level student with an opportunity to maintain speaking skills enhanced by the study abroad experience. Prerequisite: at least one term abroad in a Spanish-speaking study abroad program. Offered spring semester.

SPN 421. ADVANCED GRAMMAR I 4 sh
An intensive study of the most problematic parts of the Spanish verb system. Particular attention will be given to the two past tenses (preterit and imperfect), ser versus estar and the subjunctive. Composition, translation and oral practice will all be used to increase grammatical accuracy. Prerequisite: at least one upper-level Spanish course above SPN 320 or permission of instructor. Offered every other year.

SPN 422. ADVANCED GRAMMAR II  4 sh
A continuation of SPN 421 Advanced Grammar I, but 421 is not a prerequisite for this course. Topics will include: object pronouns and the dative of interest construction; other uses of pronouns; the passive voice and substitute constructions; impersonal constructions; relative clauses; adverbs and adverbial clauses; and prepositions, with particular attention to por and para. The course will include readings, compositions, and Internet research projects and class presentations. Prerequisite: at least one advanced level Spanish course (i.e., above SPN 320) or permission of the instructor. Recommended, but not required: SPN 421. Offered every other year.

SPN 451. PHONETICS 4 sh
This course is designed to give students an in-depth understanding of the phonetic system of the Spanish language and to perfect the student’s pronunciation. Students will learn how sounds are produced and will learn to imitate native speakers accurately through a variety of classroom exercises, recordings and videos. Through phonetic transcription and listening exercises, students will learn to hear accurately and to distinguish between similar sounds. Students will also study with wide phonetic variations that occur within the Spanish-speaking world. Prerequisite: SPN 222 or permission of instructor. Offered every other year.

SPN 461. TRANSLATION 4 sh
Designed to help advanced students refine their language skills and express themselves more accurately in Spanish by focusing on form through intensive translation practice. Includes practice in both Spanish-to-English and English-to-Spanish translations, incorporating concepts such as cognates and false cognates, metaphorical language, different registers and the importance of maintaining the tone and register of the original text in the translation. Different problems inherent in the translation process are discussed. Prerequisite: at least one course above the SPN 320 level or permission of the instructor. Recommended but not required: SPN 421. Advanced Grammar I. Offered every other year.

SPN 465. COLLOQUIUM ON HISPANIC STUDIES 4 sh
This capstone course focuses on the critical study and analysis of specific historical moments, selected works, topics or themes in literary and cultural history. Course content will alternate between peninsular and Latin American topics, or combine readings from each area. As part of their senior assessment, students will complete original research on a topic, present their findings orally to the class and department members and write a research paper on the same topic in Spanish. In order to graduate with a Spanish major, students must pass this course with a C or better. Prerequisite: At least two courses beyond the 322 level and junior or senior standing. Offered fall semester.

SPN 481. INTERNSHIP 1-4 sh
This course provides students with practical experience using Spanish in a professional setting and may include internships in teaching, social service, government service, business, etc., in the U.S. or abroad. Prerequisite: at least one course above the SPN 222 level and departmental approval.

SPN 491. INDEPENDENT STUDY 2-4 sh

General Studies

Director: Associate Professor Bray

The General Studies Program gives breadth as well as depth to a college education. It provides students with opportunities to see the broad view of human civilization, experience great ideas and art and learn the science and math skills without which no contemporary leader or individual can be without. Through training in writing and other communication skills as well as in learning to work independently, to think critically and constructively, to handle quantitative data, to respect cultures worldwide and to develop habits of responsible leadership, this program
develops the whole person. The General Studies program is a major focus of a college career from beginning to end — challenging students, preparing them for both leadership and independent thought and, most of all, deepening and enriching their lives.

**GST 110. THE GLOBAL EXPERIENCE** 4 sh
This first-year seminar examines public responsibility in a global context. It explores some of the implications created by cultural and natural diversity and the possibilities for human communication and cooperation within this diversity. The course emphasizes student and faculty creativity through active and collaborative learning; the seminar is writing intensive. First-year students only. Offered fall and spring.

**GST 281. THE LIBERAL ARTS FORUM** 2 sh
Students will work with the Forum, a student-run and SGA-funded organization, to select speakers, host their visits and prepare for conversations with them through reading, writing papers, making presentations and joining discussions. Offered fall.

**GST 282. THE LIBERAL ARTS FORUM** 2 sh
See description for GST 281. Offered spring.

**GST 300-499. ADVANCED INTERDISCIPLINARY SEMINARS**
These seminars are the capstone of the General Studies Program. Students work with faculty to examine an issue or topic from multiple viewpoints. The subjects of these seminars are chosen by individual faculty members and vary from semester to semester. More than 25 different topics are offered each academic year. The diverse topics reflect the expertise and interests of faculty from across the campus and allow students a wide range of choices. These courses require advanced critical thinking skills; students must weigh multiple opinions, evaluate theoretical and ethical positions and defend their own personal positions. Taken in the junior or senior year, these seminars are writing intensive, requiring students to write frequently and in a variety of ways. Prerequisite: successful completion of sophomore writing assessment.

**Selected recent seminars**
These topics may, or may not, be offered in the future.

**GST 338. AMERICAN ADOLESCENCE** 4 sh
This interdisciplinary seminar explores the male and female experience of coming of age in America. We will study major psychological and sociological theories of adolescence and examine how the transition from childhood to adult life is represented in literature and film. Counts toward the Women’s Studies/Gender Studies minor. Prerequisite: successful completion of sophomore writing assessment.

**GST 346. CHILDBIRTH** 4 sh
This course will provide students with the opportunity to explore the topic of childbirth from a personal, biomedical, psychosocial, cultural and historical perspective. Students will write a scholarly paper and work in teams to research particular areas related to childbirth. Counts toward the Women’s Studies/Gender Studies minor. Prerequisite: successful completion of sophomore writing assessment.

**GST 348. LIFE STORIES** 4 sh
This course helps students identify the “life stories” they are living. It draws on literary, psychological, religious and philosophical resources. Daily writing assignments from Sam Keen’s *Your Mythic Journey* will culminate in a personal story which remembers the past, reflects on the present, envisions a future and clarifies personal beliefs and values. Contemporary films such as *A River Runs Through It* and conversations with community partners will serve as additional catalysts for writing one’s story.

**GST 365. QUEST FOR WHOLENESS** 4 sh
This course is a two-semester mentorship which meets once a week to create a space where learning and life can be integrated from the perspective of the humanities. The work of the year concentrates on the professional and personal, on work and relationships, on inner development and service to others. The inquiry touches all seven domains of life: personal, interpersonal, familial, institutional, cultural, planetary and the encompassing sphere of mystery.

**GST 369. MEN AND MASCULINITY** 4 sh
This course will take an in-depth look at how various cultures (Western and non-Western) have defined masculinity. Sources of investigation will include literature, the media and social institutions such as the family, religion, politics, leisure and others. The course will explore how men conceptualize their bodies and spirits, and how they practice relationships with other men, women, parents and progeny. Counts toward the Women’s Studies/Gender Studies minor. Prerequisite: successful completion of sophomore assessment.

**GST 384. THE KENNEDY ASSASSINATION AND FILM** 4 sh
This course will explore the details of the assassination of President John F. Kennedy and the way it has been presented in film. Special emphasis will be placed on the study of the assassination as a film genre and any residual effects on the world of motion pictures.

**GST 401. LATINOS IN THE U.S.** 4 sh
This course is conducted in Spanish. Studies the diversity of the culture, history and social, economic and political situation of the Latino population in the United States through literature, film, music, current articles on the subject and direct contact with the population when possible. Readings will be assigned in Spanish and English. This course continues to develop students’ language skills toward the proficiency goals required of all majors. Prerequisite: successful completion of SPN 310 or equivalent or permission of instructor. Successful completion of sophomore assessment. Cross-listed with SPN 363.

**GST 420. SCIENCE & RELIGION: BRIDGING THE GAP** 4 sh
This seminar is an exploration of the complex and fascinating interplay of these two ways of knowing. We will study the fundamental uncertainties that form borders to the reach of science and seek to build bridges to the realms of religious experience.

**EXPERIENTIAL LEARNING** 1 unit
The Experiential Learning Requirement (ELR) asks students to practice close observation of the world around them and to reflect insightfully on those observations. Exposure to diversity helps students see the interrelationships between academic studies and other experiences. The requirement may be met through one of the following ways: (1) field-based courses: study abroad, internships/co-ops, practicums and student teaching; (2) independent research conducted under the direction of a professor; (3) 40 hours of pre-approved service/volunteer activities (see Kernodle Center for Service Learning); (4) 40 hours of pre-approved leadership activities (see Leadership Development Office); and (5) 40 hours of pre-approved individualized learning activities (see Career Center).
Geographic Information Systems
Coordinator: Assistant Professor Xiao
Associate Professors: Glaesel Frontani, MacFall, Morgan, Powell
Lecturer: Klickner

The Geographic Information Systems minor is designed to prepare students with the basic training necessary to enter the rapidly expanding field of geographic information science (GIS). Employment opportunities are limitless for students who are proficient with this interdisciplinary tool. Well-qualified GIS specialists are sought in the areas of environmental study, physical sciences, business, economics, education, government, planning and international industries. The minor is designed to provide students with basic knowledge and skills in GIS, remote sensing, cartography, database management and computer technology, and to explore application of these skills in courses selected from a wide variety of disciplines. Students are given hands-on experience with state of the art computer programs and software.

This minor includes core courses from the Computing Sciences, History & Geography, Political Science & Public Administration Departments and the Environmental Studies program. There are two components to the curriculum: a set of core courses required of all students enrolled in the program and a set of selective courses that permit exploration of more advanced themes in GIS and/or development of individual research projects or internships in GIS.

A minor in Geographic Information Systems requires the following courses:

GIS 460. ADVANCED GIS 4 sh
This advanced level course in Geographic Information Systems (GIS) will build on the techniques learned in ENS/GEO 350 (Introduction to Geographic Information Systems) by exposing students to more advanced methods in developing and utilizing GIS data. It is designed primarily to provide students with an in-depth understanding of GIS applications, the theoretical/conceptual side of algorithms in GIS software and GIS research trends. Prerequisites: GEO 350, GEO 356.

Geography
Coordinator: Associate Professor Glaesel Frontani
Assistant Professor: Honglin Xiao

The geography program offers a minor in Geography. Geography explores the dimensions of space. How do location affect societies, economics, politics, culture and ecosystems? How do we analyze, describe and construct boundaries, both natural and human, which we then impose on the physical and intellectual worlds we live in? The study of geography is much more than maps. It includes study of both the natural world and the varied patterns of human life on both the macro and micro scales.

Graduates with training in geography are sought as: Geographic Information Systems Specialists to work with GIS computer mapping software and related technology for government at the local, state or federal level as well as for a wide variety of businesses and corporations; Regional Specialists to work for the Central Intelligence Agency, Foreign Service, Peace Corps or community activist organizations; Business, Economist and Population Geographers to work for insurance companies, in real estate, for federal agencies such as the Census Bureau or to work in market-oriented businesses; Environment and Recreation Specialists to work for botanical gardens, the U.S. Forest Service, the U.S. Park Service or parks and recreational agencies; and Teachers and Map Librarians to work at elementary or secondary schools or at universities.

Several geography courses count towards area concentrations in the International Studies major and the Society and Environment concentration in the Environmental Studies major. Our GIS lab offers opportunities for hands-on learning and to obtain the latest computer mapping and spatial analysis skills. Gamma Theta Upsilon, the International Honor Society in Geography has a campus chapter.

GEO 121. INTRODUCTION TO PHYSICAL GEOGRAPHY 4 sh
Students will examine the processes which control the spatial distribution of climate, vegetation, soils and landforms. Topics include earth-sun geometry, global energy balance, hydrology, tectonics, atmospheric and mass wasting, climatic classification and climographs, and land and coastal and fluvial geomorphology. Focus will be on the Earth as the home of humans and the impact of humans on their environments.

GEO 131. THE WORLD’S REGIONS 4 sh
This survey of the regions of the world emphasizes place names and environmental and human characteristics which provide both the common traits and the distinctive characteristics of different places. Students analyze change, problems, potentials and alternative futures and use traditional and electronic data sources, atlases and methods of data presentation. Offered fall and spring.
requires the following courses:

GEO 356. INTRODUCTION TO REMOTE SENSING  2 sh
This course will provide an introduction to the basic concepts and processes of remote sensing, covering the principles of electromagnetic radiation and its interaction with the atmosphere and earth surface, basic photogrammetry, aerial photographs and satellite data interpretation, and digital image processing. Students will be exposed to remote sensing theory and hands-on exercises involving satellite data using the industry standard computer programs.

GEO 355. INTRODUCTION TO CARTOGRAPHY  2 sh
This course serves as an introduction to the art and science of cartography, covering its history, basic elements of maps, map projections, scales and generalization, measurements from maps, topographic features, qualitative and quantitative information, basic surveying techniques, the elements of map design and the presentation, compilation and production of maps using a variety of different mapmaking techniques and technologies.

GEO 350. INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS  4 sh
This course will introduce the student to the concept of visualizing, exploring and analyzing data geographically. The student will obtain hands-on experience of display, analysis and presentation of mapping functions using the latest ArcView GIS software. Assignments will be geared toward environmental management and decision making. GEO 350 is cross-listed with ENS 350. Offered in the fall.

GEO 342. GENDER AND ENVIRONMENT IN SOUTH AMERICA  4 sh
This course will explore how people's interactions with nature as well as their political and social environments are influenced by gender. Through autobiographies, videos, ethnographies, diaries, travel narratives and more, we will look into the lives of male and female political prisoners, activists for environmental and social change, the home- less and others in a regional context of democratization, rapid urbanization and an ongoing drug trade. Counts toward the Women's Studies/Gender Studies minor.

GEO 331. STUDY ABROAD: ANALYZING YOUR INTERNATIONAL EXPERIENCE  4 sh
This course is designed for students who have studied abroad and would like to reflect upon and expand their understanding of their experiences overseas in a shared learning setting. We will explore issues of identity and place, ideology (values, norms and customs), society (conformity/autonomy, gender and class) and structure (religious, political and economic) as we share, analyze and reflect upon our international experiences. The course contains significant research and/or experiential service-learning components. Prerequisite: study abroad for at least two winter terms or one semester.

GEO 320. GEOGRAPHY OF AFRICA  4 sh
This course surveys the physical, cultural and political-economic geography of Africa with an emphasis on human-environment relationships. Important themes include the diversity of people (ethnicity, gender and religion), tropical deforestation, farming systems, social unrest, refugees, AIDS, drought and famine, dams and irrigation schemes, urbanization, endangered species, wildlife conservation and parks. All students will participate in a major experiential learning project. Counts toward a minor in African/African American Studies.

GEO 310. DEVELOPMENT AND THE ENVIRONMENT IN LATIN AMERICA, AFRICA AND SOUTH ASIA  4 sh
This course is concerned with environmental issues primarily in “developing” countries. This course will provide a forum for discussing and analyzing the geopolitics of international environmental conservation programs often devised in wealthier countries but applied in the “third world” as well as the social and environmental consequences of large-scale and small-scale development projects.

GEO 481. INTERNSHIP IN GEOGRAPHY  1-4 sh
Internship is limited to four semester hours credit toward geography minor. Prerequisites: GEO 121, 131 and permission of instructor.

GEO 491. INDEPENDENT STUDY  1-4 sh
GEO 499. INDEPENDENT RESEARCH  1-4 sh
Students engage in independent research projects related to the field of geography in conjunction with a faculty mentor. Prerequisites: junior or senior status and geography program approval.

Health Education
Chair, Department of Health and Human Performance: Professor J.P. Brown
Associate Professors: Davis, Miller
Assistant Professors: Baker, Hall, Parson, Smith, Walch
Instructors: Allen, Reilly, Stevens

The health education curriculum located within the Health and Human Performance Department is designed to prepare teachers of health and safety education (kindergarten through senior high school) in both public and private school systems. The program of study incorporates school goals and objectives for establishing and maintaining quality health education programs that are planned, comprehensive, personalized, practical, sequential and oriented toward mental, social and physical well-being.

This is accomplished through a wide range of specialized theory courses and many opportunities to apply, evaluate and refine necessary skills in laboratory settings. Studies in health education explore ways to educate students and the public about contemporary health issues such as personal safety, nutrition, substance abuse, disease prevention and human sexuality.

A major in Health Education requires the following courses:

HED 220 First Aid  1 sh
HED 321 Health Services and Consumerism  4 sh
HED 324 Nutrition  4 sh
HED 325 Substance Abuse and Human Behavior  4 sh
HED 326 Human Sexuality  4 sh
HED 421 Chronic and Acute Diseases  4 sh
PED 305 Legal Aspects  2 sh
PED 411 Measurement and Evaluation  4 sh
BIO 161 Human Anatomy  4 sh
BIO 162 Human Physiology  4 sh
