Elon University’s graduate programs combine the best of the liberal arts and sciences with nationally accredited professional and graduate programs that enable students to attain the skills needed to reach their professional goals. Elon is one of only seven private universities in the nation with accredited schools of law, business, communications, health sciences, and education, along with a chapter of Phi Beta Kappa, the nation’s oldest and most prestigious academic honor society.

Each of our academically rigorous programs is stamped with the university’s distinctive and nationally recognized approach to learning that includes small classes, dedicated faculty scholars, and opportunities to gain practical experience in a university environment fully committed to inquiry and research.

- The Martha and Spencer Love School of Business, offers a Master of Business Administration, ranked among the nation’s top 20 part-time MBA programs in the nation and the top program in North Carolina by Bloomberg Businessweek magazine, and the Master of Science in Management with concentrations in organizational analytics and corporate communications.

- The School of Health Sciences, immerses students within the Doctor of Physical Therapy and Master of Science in Physician Assistant programs in rigorous research experiences and features exceptional clinical practicums to reinforce classroom learning.

- The Master of Education program in the School of Education, the Master of Arts in Interactive Media in the School of Communications, and the MBA program feature global study experiences that provide students with international perspectives and opportunities.

- Elon’s School of Law offers a groundbreaking and highly experiential legal curriculum based on foundational legal skills, mentoring from experienced lawyers, and direct work with clients that position students to excel in the rapidly evolving legal profession.

At Elon, graduate students discover valuable knowledge, experiences, and skills in an engaging intellectual climate distinguished by:

- A student-centered community that enables students to develop strong, mentoring relationships with faculty and staff, with their peers, and with alumni.

- A globally engaged institution with students engaged in learning in every corner of the world through the university’s top-ranked global study program.

- An experiential curriculum filled with hands-on learning opportunities in the classroom, in the lab, and on the job.

- A transformative environment for learning with the nation’s finest facilities and learning resources that breed powerful collaboration and spark bold ideas.

- Ambitious students, faculty, and staff, who are restless in all the right ways, unafraid to set high expectations, rising to every challenge, and constantly striving to build a better world.

I welcome your interest in graduate education at Elon and hope you will give serious consideration to joining our community of scholars.

Sincerely,

Leo M. Lambert
President, Elon University
Graduate Education at Elon

Located in the beautiful Piedmont section of North Carolina, Elon University is the premier student-centered learning environment, preparing graduates to be the ethical leaders the world needs. Academic innovation is the hallmark of an Elon education, and the Master of Business Administration (MBA), Master of Science in Management (MSM), Master of Education (M.Ed.), Master of Arts in Interactive Media (M.A.), Doctor of Physical Therapy (DPT), Juris Doctor (J.D.) and Master of Science in Physician Assistant Studies (M.S.P.A.S.) programs exemplify Elon’s commitment to combining a stimulating classroom environment with opportunities to apply knowledge in a practical setting.

MBA

The Elon MBA offers a rigorous curriculum featuring a core foundation of general management skills, career-focused specializations and a flexible schedule designed for working professionals. Ranked among the nation’s top 20 part-time MBA programs in the nation and the top program in North Carolina by *Bloomberg Businessweek* magazine, the Elon MBA features a careful blend of conceptual knowledge, critical thinking skills and practical exercises that enable you to develop the skills you need to apply business knowledge in many different situations, communicate effectively, understand multiple perspectives of a problem and use ethical reasoning to determine how a proposed solution may affect your company and the wider community. Designed to be completed in 21 to 33 months, the Elon MBA also includes two regularly scheduled MBA international study trips per year.

M.S. in Management

The newest graduate program to be offered by the School of Business, the Master of Science in Management, combines a solid grounding in business fundamentals with in-depth training in a specialized field of study. The program can be taken as a 4+1 graduate professional degree that will prove appealing to students from the Arts and Sciences and professional schools. It is offered in full- and part-time schedules. Students who wish to attend full time can complete the program in one year. Working professionals can take classes on a part-time basis. The program combines a core of business fundamentals and concentrations that will be attractive to a wide variety of hiring organizations, profit and not-for-profit, leading to employment opportunities domestically and abroad. Concentrations are offered in Organizational Analytics and Corporate Communications (a partnership with the School of Communications). The Elon Master of Science in Management program is much more than a collection of classes—it welcomes you into a rich, supportive community of students, alumni and faculty who quickly become colleagues, mentors and friends. The program is enhanced with workshops that focus on career and professional development along with training in Excel and other job-essential skills.
M.Ed.

The M.Ed. program offers graduate licensure in elementary education (K-6), gifted education (K-12) and special education (K-12). In the M.Ed. program, students hone skills for implementing appropriate instruction and differentiating curriculum for all students while deepening their understanding of the different content areas. Though skill development is an important aspect of the program, empowering teachers to make professionally mature decisions and developing collaborative leadership and research expertise are also emphasized. The M.Ed. program provides licensed teachers the opportunity to complete the degree across three summers and two academic years. The program also provides the opportunity to study abroad in Costa Rica.

M.A. in Interactive Media

In the rapidly converging world of media, the Elon Master of Arts in Interactive Media prepares students to be savvy multimedia professionals nimble enough to anticipate changes ahead and to be leaders in an evolving industry. Students will be ready to think strategically across media platforms; to plan and create interactive media content consisting of text, images, sounds, video and graphics; manage information for interactive news, entertainment and strategic communications; and to work in any profession that employs interactive media skills. The intensive 10-month program begins with a broad sweep of information and then allows students to drill down to specific areas of interest. The curriculum includes hands-on production and theoretical courses along with a Winter Term, team-project course where students create an interactive product that involves international travel. The M.A. in Interactive Media allows students to design, produce and create projects that are rapidly becoming the principal components of 21st century digital media.

DPT

Graduate students enrolled in the three-year, full-time Doctor of Physical Therapy program have unique opportunities to practice specific learning objectives in a variety of clinical settings. The partnership between Cone Health-Alamance Regional Medical Center and Elon’s Department of Physical Therapy offers students a wealth of clinical and research opportunities. The philosophy of the DPT program emphasizes critical thinking, active learning, strong clinical experiences and inquiry-based approaches to treatment and research. The program produces graduates who are highly skilled clinician generalists and compassionate individuals, well-prepared for leadership as key members of a health care team.

PA

Elon’s PA program prepares graduates to think critically and act skillfully to meet expanding health care needs in local and global communities. Students prepare to be leaders in their field. Elon’s 27-month, primary care-focused program employs a holistic approach to health care that emphasizes medical knowledge, interpersonal communication, patient care, professionalism and practice-and systems-linked learning. Students get to know patients as individuals and learn to care for them wholly in body, mind and spirit. Dynamic classroom experiences, discussions and lectures create a foundation of knowledge that is complemented
by hands-on work with patients and medial providers who will become mentors. Students graduate ready to work in one of the most in-demand professions in the nation.

**J.D.**

The Elon University School of Law opened in downtown Greensboro, North Carolina, in fall 2006 with a charter class of 100 students. In fall 2015, Elon Law launched a fully redesigned curriculum that addresses widely recognized shortcomings of traditional legal education and enables students to earn a law degree in less time and at a lower cost. In addition, Elon Law provides more real-world experiences, logically sequenced curriculum, rigorous skills training, professional connections and engaged-learning experiences working with clients in five clinics and a renowned leadership program. The carefully crafted sequence of rigorous courses and immersive experiences integrate the best of traditional classroom instruction with highly experiential professional residency placements. Students are empowered to gain the knowledge, skills, judgment and professionalism that are crucial in today’s world of law.

The School of Law produces a separate academic catalog, which can be accessed online at law.elon.edu.

**Visiting and contacting campus**

Visitors to the university are welcome at all times. Administrative offices are open Monday through Friday from 8 a.m. until 5 p.m. The Office of Graduate Admissions is located on the Elon campus in the Inman Admissions Welcome Center. Graduate Admissions can be reached at 336-278-7600. You may also wish to contact us by email at gradadm@elon.edu. For information about visiting the School of Law, contact the Admissions office at 336-279-9200 or law@elon.edu.

The University does not discriminate on the basis of age, race, color, creed, sex, national or ethnic origin, disability, sexual orientation, gender identity or veteran’s status or any other characteristic protected by law in the recruitment and admission of students, the recruitment and employment of faculty and staff or the operation of any of its programs. Students with documented disabilities may request in writing reasonable special services and accommodations. Questions should be directed to Ms. Susan Wise, disability services coordinator, Duke Hall, room 1081, (336) 278-6500. The university’s Section 504 coordinator for students and Title IX coordinator is Dr. Jana Lynn Patterson, Student Health and Wellness Suite 104, (336) 278-7200. The university’s Section 504 coordinator for applicants and current employees is Mr. John Lew, 314 W. Haggard Ave., (336) 278-5560.

In accordance with the Student Right-to-Know and Campus Security Act, complete information regarding campus security policies and programs and campus crime statistics is available upon request from the Office of University Communications, 2030 Campus Box. Information regarding completion and graduation rates may be obtained from the Office of Admissions or at elon.edu/irweb. For support or to report an incident of bias, discrimination and/or harassment visit elon.edu/biasresponse.
Introduction

The mission of Elon University graduate programs

Through its graduate programs, Elon University gives students the opportunity to acquire a high level of competence in their fields of interest and to gain significant experience in the application of advanced knowledge and skills. Graduate programs offered at Elon foster a stimulating intellectual community based upon close interaction with faculty, academic engagement with peers in and out of the classroom and a university environment fully committed to supporting inquiry and research. Graduates from Elon’s advanced degree programs are prepared to assume positions as active professionals committed to continued learning and the advancement of their professions.

Elon University offers graduate programs that are:

- Connected to the university’s undergraduate programs, building on existing strengths and contributing to the enhancement of the quality of the undergraduate experience.
- Committed to the broad perspective of arts and sciences.
- Distinctive, excellent in overall quality and responsive to the needs of society.
- Committed to the intellectual growth and development of each student.
- Supportive of both faculty and student scholarly activity and its dissemination to the appropriate community of scholars and practitioners.

Elon University Honor Code

All students at Elon University pledge to abide by the Honor Code, which recognizes honesty, integrity, respect and responsibility as critical elements in upholding the values of the academic community. The current Student Handbook, elon.edu/students/handbook, presents sanctions and hearing procedures in detail.

History

Elon University is a private, coeducational and comprehensive university. Founded in 1889 by the Christian Church (now United Church of Christ), it is the third largest of North Carolina’s 36 private colleges and universities.

During the 1980s, Elon experienced a decade of unprecedented growth. During this time, applications doubled and enrollment increased 35 percent, making Elon one of the fastest-growing institutions in the region. Dozens of academic and student life programs were added to enrich the quality of an Elon education. Special classes and volunteer programs were developed to provide students with leadership and service opportunities. In fall 1984, the university began offering a Master of Business Administration degree through the Martha and Spencer Love School of Business. In fall 1986, a Master of Education degree was added, and in 1997, a Master of Physical Therapy degree program was established. In
2003, the Doctor of Physical Therapy replaced the MPT. The Elon University School of Law opened in fall 2006. The Master of Arts in Interactive Media program was established in fall 2009. The Master of Science in Physician Assistant Studies program began in January 2013. Elon’s most recent graduate program is the Masters of Science in Management. This program enrolls its inaugural class fall 2015.

Also during the ’80s and ’90s, the university’s physical plant grew. Total campus acreage doubled, square footage of buildings increased and significant new facilities were added, including Carol Grotnes Belk Library, featuring 75,000 square feet with more than 100 computers, networked study rooms and multimedia and audiovisual stations; Dalton L. McMichael Sr. Science Center, providing 81,000 square feet of research laboratories, high-tech instrumentation and computer technology; Moseley Campus Center, a 74,000-square-foot student center; and Koury Center, a physical education, athletics and recreation complex. In the early part of the new century, Elon opened Rhodes Stadium, Belk Track, White Field and five pavilions in the Academic Village.

In the summer of 2006, Elon opened the three-story, 60,000-square-foot Ernest A. Koury, Sr. Business Center, home of Elon’s Martha and Spencer Love School of Business. The Center includes the LaRose Digital Theatre; the LabCorp Suite for Executive Education; the William Garrard Reed Finance Center with real-time data from global financial markets; the Doherty Center for Entrepreneurial Leadership; the Chandler Family Professional Sales Center and the James B. and Anne Ellington Powell Lobby.

In the summer of 2009, Elon renovated the second floor of Powell Building to become the home of the Master of Arts in Interactive Media program. The Powell Interactive Media Suite houses a state-of-the-art computer laboratory/production facility and classroom. It includes five editing suites and a graduate study center and a lounge. The suite also houses DSLR cameras, which shoot still photos and high definition video. Offices for interactive media faculty are also located in the Powell Interactive Media Suite. Additionally, high-definition cameras, audio recorders, lighting kits, booms and other equipment to produce interactive media are available for checkout from the School of Communications.

In April 2011, the Elon University Board of Trustees established the School of Health Sciences. The school is housed in the Gerald L. Francis Center, a renovated space that opened in December 2011 and includes classrooms, lab facilities, meeting and office space.

**Location**

Elon’s historic 636-acre campus in central North Carolina is designated as a botanical garden and includes the 56-acre Elon University Forest, a land preserve and natural area for scientific research; and Loy Farm, a center for environmental research and sustainability that includes a solar farm. The university is a 40-minute drive from the University of North Carolina at Chapel Hill and Duke University, and 30 minutes from Greensboro, a city that regularly offers major concerts and sporting events. A dozen other colleges and universities are less than an hour away.
Downtown Greensboro is also the location of the Elon School of Law, an 84,000-square-foot facility including a new multimillion-dollar library collection, wireless technology, courtroom and specialized labs and classrooms, adjacent to federal and state courts, government offices and major law firms.

Airline services are conveniently located at the Piedmont Triad International Airport in Greensboro and at the Raleigh-Durham International Airport. Amtrak serves Greensboro and Raleigh with daily connections to Burlington.

**Degrees and majors**

Elon’s rigorous curriculum is grounded in the traditional liberal arts and sciences and complemented by nationally accredited professional and graduate programs. The 424 full-time faculty members teach in more than 60 undergraduate majors, along with master’s programs in business administration, management, education, interactive media and physician assistant studies; and doctoral programs in physical therapy and law. Elon’s four-year graduation rate of 78 percent ranks in the top 10 percent of U.S. private universities.

Elon’s graduate programs include a Master of Business Administration (MBA) and a Master of Science in Management (MSM) at the Martha and Spencer Love School of Business; a Master of Education (M.Ed.) with specialty areas in elementary, gifted and special education; a Master of Arts in Interactive Media (M.A.) through the School of Communications; a Doctor of Physical Therapy (DPT) and a Master of Science in Physician Assistant Studies (M.S.P.A.S.) through the School of Health Sciences; and a Juris Doctor (J.D.) degree through the School of Law.

**Enrollment**

Elon’s 5,903 undergraduate and 728 graduate students come from 50 states and 49 other countries. About 27 percent are from North Carolina, with strong enrollment numbers from the Northeast, Mid-Atlantic and other states across the country.

**Accreditation**

Elon University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award bachelor’s and master’s degrees, the doctor of physical therapy degree and juris doctor degree. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033–4097 or call 404–679–4501 for questions about the accreditation of Elon University, to file a third-party comment at the time of Elon University’s decennial review, or to file a complaint against Elon University for alleged non-compliance with a standard or requirement. For normal inquiries about Elon University such as admissions requirements, financial aid and educational programs, etc., contact Elon University at 336–278–2000.

*The Master of Business Administration program* is accredited by AACSB International – The Association to Advance Collegiate Schools of Business.
The Master of Science in Management program is accredited by AACSB International – The Association to Advance Collegiate Schools of Business.

The Master of Education program is accredited by the National Council for Accreditation of Teacher Education and by the North Carolina State Department of Public Instruction.

The Master of Arts in Interactive Media program is a part of the School of Communications. The school and program are accredited by the Accrediting Council on Education in Journalism and Mass Communications (ACEJMC).

The Doctor of Physical Therapy program at Elon University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703-706-3245; email: accreditation@apta.org; website: http://www.capteonline.org.

The Juris Doctor program is accredited by the American Bar Association (ABA).

The ARC-PA has granted Accreditation-Provisional status to the Master of Science Physician Assistant Studies Program sponsored by Elon University. Accreditation-Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program’s ability to meet the ARC-PA Standards or when a program holding Accreditation-Provisional status appears to demonstrate continued progress in complying with the Standards as it prepares for the graduation of the first class (cohort) of students. Accreditation-Provisional does not ensure any subsequent accreditation status. It is limited to no more than five years from matriculation of the first class.

**Belk Library**

Belk Library is located at the center of campus, convenient to all graduate classrooms. It is uniquely designed to integrate print, electronic and audiovisual resources, with an extensive program of research, tutoring and technical support available during all hours of operation to assist students, faculty and staff. Fourteen librarians with subject expertise are available for research consultations. More than 100 Macintosh and Windows computers offer access to over 150 research databases, the library catalog and the Internet. Students can choose among a wide variety of individual and group study spaces while using the more than 350,000 volumes, government documents and media resources. More than 59,000 online journals are available, as well as an extensive video and audio collection.

Belk Library also houses the Tutoring Center, the Writing Center and Teaching and Learning Technologies. Please visit elon.edu/library for more information.

**Writing assistance and computer services**

Elon has a well-established writing center located in Belk Library. Graduate students seeking assistance with writing may utilize the services of the center, including one-on-one tutoring, without charge. Graduate students may use computer labs with Internet access, and
they can access their free email accounts. Staff members are available to provide assistance. There are approximately 940 computer work stations on campus in 50 computer labs.

**Career services and professional placement assistance**

The Student Professional Development Center, located in Moseley Center, assists graduate students individually as they identify their career direction and finalize their career search. The Career Center has incorporated modern technology to provide effective student/employer matches and to assist students in accessing current employer literature. Programs for graduate students include resume referral to employers, individual job search assistance, job vacancy lists and workshops on resume writing and job interviewing. For details, please visit elon.edu/careers.

**Parking**

Student parking at Elon is convenient and easily accessible. For full-time students enrolled in the DPT and M.S.P.A.S. programs the annual fee for parking is $160 for the first year. DPT students pay $80 annually for parking in year two and three. No parking fees apply for graduate students enrolled in the second and third year of the M.S.P.A.S. program. The annual fee for students in the Interactive Media, MBA, MSM and M.Ed. programs is $30.

**The graduate admissions process**

Elon’s admissions policy encourages the selection of students who have demonstrated both academic ability and talent in their field. Each application is considered in light of all completed academic work, test scores, evidence of leadership and motivation, work history, credentials and letters of recommendation.

Applicants should consult the section in this catalog dealing with their desired degree for specific admissions requirements. This information, as well as an application, can also be obtained from the Elon Graduate Admissions website at elon.edu/graduate.

**Basic requirements**

- Evidence of an earned bachelor’s degree from an accredited college or university
- Strong undergraduate record
- Official transcripts of all undergraduate and any graduate studies completed or taken
- Letters of recommendation
- TOEFL scores for international students, unless English is the student’s native language or the language of instruction

**Application procedures, testing, transfer credits and graduate program costs**

Since all of Elon’s graduate programs differ in application procedures, testing, transfer credits and program costs, graduate students should consult the section in this catalog dealing with their desired degree for program-specific information.
Forms of financial assistance for graduate students

Elon is committed to assisting eligible students in securing the necessary funds for their graduate school program. To the extent possible, eligible students receive assistance through careful planning and through accessing various forms of financial assistance.

In order to receive any type of university, state or federal funding, students must demonstrate satisfactory academic progress toward the completion of graduate degree requirements. No financial assistance is offered until an applicant has been accepted for admission to a graduate program.

Elon University payment program
Elon offers a payment plan to all graduate students. The plan requires an initial payment of one-third of the total cost of the program with the remainder divided into two equal payments. In addition, for the M.Ed. program, there are alternative payment plans. For further information on payment plans, contact the Bursar’s office. Students must submit a new application for each semester.

We are making a policy adjustment that will affect students that pay tuition and fees with credit cards. While we understand the reasons people choose this payment method, the university has borne the cost of paying transaction fees to the credit card companies, amounting to approximately $1.1 million annually. We believe that money would be much better spent supporting our educational mission.

As a result, families that pay tuition statement bills with MasterCard, Discover, American Express and VISA cards will be assessed a 2.75% convenience fee. Students that wish to avoid the fees are encouraged to use online checks/ACH or personal checks, wire transfers or other payment options. There will be no extra fees for other Elon transactions, such as online tickets or Phoenix Cash deposits. In addition, the university accepts American Express, VISA, MasterCard and Discover cards for payment of books.

If you have questions about the new payment options, contact the Bursar’s Office.

Federal Stafford Loan (unsubsidized)
Graduate students may borrow up to $20,500 annually. Repayment of principal begins six months after graduation or when you are no longer enrolled at least half-time. The fixed interest rate is set by the Department of Education and will be established each award year. A small processing fee will be withheld by the Department of Education from your requested loan amount. Federal regulations require the loan proceeds to be disbursed in two equal amounts. These proceeds are applied directly to your tuition account. Unsubsidized Stafford Loans are available through the Direct Loan program, which is administered by the federal government. All loans will be processed with the Department of Education as your lender. First-time borrowers will be required to complete a Master Promissory Note with the Department of Education and are also required to complete student loan entrance counseling at www.studentloans.gov. Information about the Federal Stafford Loan (unsubsidized) may be obtained from the Office of Financial Planning website at elon.edu/finaidborrow.
The Federal Graduate PLUS Loan Program
This is a loan made to graduate and professional students based on credit worthiness. You may borrow up to the cost of education less any other financial aid awarded. Federal regulations require the loan proceeds to be disbursed in two equal amounts. These proceeds are applied directly to your tuition account. Graduate PLUS loans are available through the Direct Loan Program, which is administered by the federal government. All loans will be processed with the Department of Education as your lender. The fixed interest rate is set by the Department of Education and will be established each award year. The Department of Education will withhold a small processing fee from your requested loan amount. First-time borrowers will be required to complete a Master Promissory Note with the Department of Education and are also required to complete student loan entrance counseling at www.studentloans.gov. Information about the Graduate PLUS Loan may be obtained from the Office of Financial Planning website at elon.edu/finaidborrow.

Forgivable Education Loans for Service
Created by the 2011 N.C. General Assembly, this program is a forgivable loan providing funding to students pursuing degrees in certain critical fields. Recipients must sign a promissory note agreeing to repay the loan by working in North Carolina in their approved field of study. Visit the College Foundation of North Carolina’s website for more information (CFNC.org/FELS) or 866-866-2362.

Yellow Ribbon Program
Elon’s DPT program is participating in the federal government’s Yellow Ribbon Program, designed to assist post-9/11 veterans with secondary and post-secondary educational opportunities. Elon’s DPT program will contribute $5,000 to three post-9/11 veterans on a first-come, first-serve basis, which will be matched by the U.S. Department of Veterans Affairs.

American Academy of Physician Assistants
Elon PA students are encouraged to review the Student Academy of the American Academy of Physician Assistants Financial Aid Resources website (aapa.org) for information about scholarships, awards and grants.

National Health Service Corps
The National Health Service Corps (NHSC) scholarship is a competitive program that pays tuition, fees and provides a living stipend to students enrolled in accredited medical (MD or DO), dental, nurse practitioner, certified nurse midwife, and physician assistant training programs. Upon graduation, scholarship recipients serve as primary care providers between 2 and 4 years in a community-based site in a high-need Health Professional Shortage Area (HPSA) that has applied to and been approved by the NHSC as a service site.

Awards are made to applicants most committed to serving underserved people, most likely to build successful careers in HPSAs, and meet future needs for care throughout the nation. Application instructions can be found at the NHSC website.
Note: Candidates must be accepted for enrollment or enrolled in a program on or before September 30 in order to apply for the scholarship. Because the Elon PA program enrolls in January, our students are eligible to apply during their first year of enrollment. For example, an Elon PA student could apply as early as March* of their first year and if awarded the scholarship begin receiving funding in July of their first year. As a result, the PA student could receive funding for a total of 21 out of their 27 months of the program.

American Physical Therapy Association
Doctor of Physical Therapy students are encouraged to review the American Physical Therapy Association website (apta.org) for information about scholarships, awards and grants.

Scholarship programs
A limited number of Doctor of Physical Therapy scholarships ranging from $6,000 to $15,000 will be awarded annually to students who have demonstrated academic ability and talent as well as an enthusiasm and commitment for the physical therapy profession. Every admitted student will be considered for scholarship in light of all academic work, GRE scores, letters of recommendation, interview scores and demonstrated leadership ability. Students will be notified of their award at the time of acceptance if selected. Students who receive a scholarship are required to maintain good academic and professional standing in the program.

A number of merit-based scholarships are also available to Interactive Media students who demonstrate an enthusiasm for learning and a commitment to energizing media communication. Scholarship amounts range from $4,000 to $12,000.

Private sources
Many companies, corporations, foundations and school systems offer assistance to students based on a variety of qualifications. Students should investigate policies of their employers and check with the many local civic organizations to determine the availability of such funds and their application procedures.

Please note that federal and state loan programs are not available to international students.

Academic regulations

Course registration
Registration information is available to all students prior to registration. Students are expected to register themselves on designated days. Registration includes academic advising, selection of courses and payment of fees. As part of the preregistration/registration process, graduate faculty are available to offer advice concerning scheduling of courses and assisting with registration. Undergraduates are not permitted to register for graduate courses.

DPT and PA students follow a varied registration procedure. Please contact the DPT program director at 336-278-6400 and the PA program director at 336-278-6847.
Changes in class schedule

The university reserves the right to cancel or discontinue any course because of small enrollment or for other reasons deemed necessary. In order to assure quality instruction, the university reserves the right to close registration when the maximum enrollment has been reached and to make changes in schedule and/or faculty when necessary.

Dropping courses

A student may officially drop any class with a “W” (withdraw without penalty) halfway through the term, which includes the week of examinations. The withdrawal period applies to programs following the regular semesters and the summer sessions. After that date, no class may be dropped. Any exception to this policy is the responsibility of the appropriate academic dean’s office.

A course dropped without permission of the Registrar is automatically graded “F.”

A student who withdraws from the university for any reason (except for a medical reason) receives grades of “W” if the withdrawal is before the designated half-term time period. After this time a student will receive a “W” or “F” depending on his/her grades at the time of withdrawal.

Graduate grading system and quality points*

Graduation is dependent upon the quality as well as the quantity of work completed. Letter grades are used. They are interpreted in the following tables, with the quality points for each hour of credit shown at right:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>

</table>
Pluses and minuses added to the letter grade pertain only to the MBA and MSM program. For the DPT and MSPAS grading system, please refer to the DPT and DPAS Student Handbook. Grades of “A” through “F” are permanent grades and may not be changed except in cases of error. After a professor has certified a grade to the Registrar, he or she may change it before the end of the next regular grading period. The change must be made in writing and have the written approval of the program director/committee chairperson.

An “I” grade signifies incomplete work because of illness, emergency, extreme hardship or self-paced courses. It is not given for a student missing the final examination unless excused by the Dean of Academic Affairs upon communication from the student. After the date designated on the appropriate academic calendar, “I” grades automatically change to “F” unless an extension is granted by the Dean of Academic Affairs.

Grade point average (GPA)

The grade point average is computed by dividing the total quality points on work attempted at Elon University by the number of hours attempted, except for courses with grades of “WD,” “W” or “S.”

Grading system for the M.A. in Interactive Media program

Graduation is dependent upon the quality of work and mastery of material in the 37 hours required to complete the Master of Arts in Interactive Media. Students will be evaluated using the following grade scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Evaluation</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>H</td>
<td>Honors</td>
<td>3 hrs.</td>

<td></td>
</tr>
</tbody>
</table>

If, in the judgment of the academic program director, faculty and administrators of the School of Communications, a student fails to make satisfactory progress toward the completion of the degree or to demonstrate sufficient promise in the discipline, the student will not be allowed to continue in the program. Registration in the following semester for academically ineligible students will be cancelled automatically.

A student becomes academically ineligible to continue in the program for the following reason: He/she receives a grade of F, or more than one grade of L per semester. For iMedia, the August and January terms are considered part of the fall and spring semesters, respectively.
Grading system for the M.Ed. program

Graduation is dependent upon the quality and completion of course work, as well as evidence of development in professional standards during the 33 hours required to complete the Master of Education in Elementary, Gifted or Special Education. Students will be evaluated using the following grade scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Evaluation</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Distinguished</td>
<td>4.00</td>
</tr>
<tr>
<td>B</td>
<td>Average</td>

</tr>
<tr>
<td>C</td>
<td>Weak</td>
<td>2.00</td>
</tr>
<tr>
<td>F</td>
<td>Unsatisfactory</td>
<td>0</td>
</tr>
</tbody>
</table>

A “B” is considered average for graduate work. The expectations should be high for graduate students and B’s accordingly should be expected. The M.Ed. program does not give D’s as final grades, as they are not considered passing.

A - Distinguished Performance
Excellent work that demonstrates not only a clear understanding of the material but also a superior ability to utilize that material in the assignment submitted. All criteria are met. The student’s work goes beyond the task and contains additional, unexpected or outstanding features.

B - Average Performance
A solid piece of work that demonstrates a good understanding of the material under study and utilizes that material well in the assignment submitted. The student meets the assignment criteria, with few errors or omissions, but there are few additional, unexpected or outstanding features. A “B” is average for graduate work. The average expectations should be high for graduate students, and B’s accordingly should be expected.

C - Weak Performance
Work that demonstrates a technical, or basic, understanding of the material under study and which utilizes that material adequately in the assignment submitted. The work meets the assignment criteria. In the graduate program, C’s cannot really be seen as “average.” After all, a student cannot remain in the program if 2 C’s are made. As such, they must be seen as “weak” rather than “average.”

F - Unsatisfactory
Work is incomplete, inappropriate and/or shows little or no comprehension of the class material in the assignment submitted.
Continuation standards and graduation requirements

Because all of Elon’s graduate programs differ in continuation standards and graduation requirements, graduate students should consult the section in this catalog dealing with their desired degree for program-specific information.

Access to student educational records

Elon University complies with the Family Educational Rights and Privacy Act of 1974. This act protects the privacy of educational records, establishes the right of students to inspect and review their educational records, and provides guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Educational Rights and Privacy Act Office concerning alleged failures by the institution to comply with the act.

Questions concerning the Family Educational Rights and Privacy Act may be referred to the Office of the Registrar.

Transcripts of student records

Requests for copies of a student’s record should be made to the Office of the Registrar, 2106 Campus Box, Elon, NC 27244. All graduate transcripts reflect the student’s complete graduate academic record. No transcripts will be issued without the written authorization of the student. No transcript is issued for a student who has a financial obligation to the university.

Changes

Adequate notice will be given to enrolled students as changes are made in the graduate programs.

Policies

Instructional and financial policies not covered in this document will follow those printed in the official Elon University Undergraduate Academic Catalog. Students may obtain a copy of this catalog from the Office of Admissions, 2700 Campus Box, Elon, NC 27244. The catalog is also available online at elon.edu/catalog.
The DPT Program

A strong program

In partnership with Alamance Regional Medical Center, Elon’s Department of Physical Therapy Education enrolled its charter class for the Master of Physical Therapy (M.P.T.) program in January 1998.

In January 2003, the MPT was replaced by a Doctor of Physical Therapy (DPT) program. Elon’s DPT program seeks to produce graduates who will be highly skilled clinician generalists. Graduates will exemplify compassion for individuals of every age, means and ethnicity, and they will be well prepared for leadership, possessing professional integrity as they become part of the health care team.

Alamance Regional’s values mirror those of Elon University: excellence, compassion, efficiency, creativity and leadership. The partnership with Cone Health-Alamance Regional Medical Center provides continuing professional growth for physical therapy faculty.

The Department of Physical Therapy Education was created to extend Elon’s mission of excellence to a new arena of professional education. It offers students an opportunity to prepare for multifaceted roles in the physical therapy profession.

A program based on a philosophy of excellence

The educational philosophy of the DPT program emphasizes preparation for the continuum of care essential to the well-being of the individual client. The faculty incorporate teaching/learning strategies appropriate for the more mature learner, utilizing current communication and computer technology. The program encourages critical thinking, active learning, strong clinical experiences and an evidence-based approach to treatment interventions.

Graduates will be prepared as clinician generalists to provide services throughout the broad spectrum of care, including intensive care, acute care, rehabilitation, outpatient care, home care and skilled nursing. Physical therapists work as members of the health care team, and they function as a point of entry into the health care system.

A unique modular curriculum

The DPT program’s unique modular curriculum is designed to integrate and coordinate courses and modules in a sequence that enhances learning. Students in the program have the opportunity to practice specific learning objectives in a variety of clinical practice settings. The program emphasizes the importance of self-awareness and self-evaluation on the part of the graduate and stresses excellence in clinical skills, compassionate care and leadership in the profession.

The Elon DPT program entails 36 months of full-time study. Didactic education (which includes classroom and laboratories to practice procedures on classmates and clients) with
integrated clinical education assignments in a variety of clinical settings occurs throughout the three years.

**Year I (beginning January)**
Year I consists of a four-week module followed by two 12-week didactic education periods. After a two- to four-week summer break, DPT students return for a 18-week module (including one weeklong break) focused on clients with musculoskeletal problems.

**Year II**
In Year II, an eight-week clinical education phase is followed by a 16-week module focused on neurosciences and clients with neuromuscular problems. Clinical Practicum II (eight weeks) and Clinical Practicum III (eight weeks) follow. Students return to campus to begin Module IX.

**Year III**
In Year III, students complete the 15-week Module IX (including three weeklong breaks). During Modules X and XI, students focus on patients with complex problems, as well as the pediatric and geriatric client. Students will learn principles of administration and supervision. During Module XII (six weeks), students participate in clinical practice selective courses preparing them for the 24-week internship.

DPT students return to campus for Module XIV, one week of electives and the graduation ceremony in December.

**Accreditation**
Elon University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, GA 30033-4097; phone: 404-679-4501) to award bachelor's and master's degree, the Doctor of Physical Therapy degree, and the Juris Doctor degree. The Doctor of Physical Therapy program at Elon University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703-706-3245; email: accreditation@apta.org; website: capteonline.org.

**Program mission**
Elon University’s Doctor of Physical Therapy curriculum, in partnership with Cone Health-Alamance Regional, provides graduate professional physical therapy education and supports faculty and student scholarly activity. Solid principles of science and research are incorporated using the highest ethical standards, while looking toward the future of the profession and its role in all health care delivery systems along the continuum of care.

**Graduate goals**
By pursuing this educational mission with integrity and the desire for excellence, the DPT Program will prepare physical therapists who reflect this vision of the profession as espoused by the American Physical Therapy Association:
Graduates are Doctors of Physical Therapy with enhanced professional identity who are prepared for interdependent practice and direct access to consumers of health care, prevention and wellness services.

Graduates are recognized by consumers as health care professionals for the diagnosis, management and prevention of movement-related impairments, functional limitations and disabilities.

Graduates have a commitment to provide comprehensive and accessible health programs for all people with dignity, respect and sensitivity to and appreciation of individual differences.

Graduates are motivated and guided by the desire for excellence and the highest possible professional, scientific, ethical, legal and moral standards.

Graduates render evidence-based physical therapy services to consumers and are committed to lifelong learning through continuing professional education and by pursuing professional growth, development and advancement.

Graduates are leaders and mentors in the physical therapy profession and promote the profession through their support and involvement in professional organizations, including the American Physical Therapy Association and community groups.

The faculty

The DPT faculty are academically skilled and bring a balance of clinical expertise and research experience to both the classroom and the clinical skills courses. There are 14 full-time faculty with doctoral degrees, four of whom hold American Board of Physical Therapy Specialties (ABPTS), including geriatrics, orthopedics and neurology (2). In addition, there are four highly qualified part-time faculty who complement the expertise of the full-time faculty.

The faculty work cooperatively to prepare Elon graduates to be clinician generalists. The curriculum includes many unique active-learning opportunities for the student. Classes and laboratories are small, so the student-faculty ratio creates an environment where faculty are accessible to students. Faculty serve as role models for students through their participation in teaching, research, clinical practice and community service on campus as well as in the greater Elon University community.

Costs

Tuition for the academic year beginning in January 2016 is $35,720. Books and living expenses are separate. While campus housing is not available for DPT students, the university provides local housing information to admitted students. A nonrefundable enrollment fee of $1,000 is also required (applied to tuition at enrollment).
**Refunds**

Tuition and fees are refunded on a pro rata basis during the first 13 weeks of each half of the academic year. The first half begins on the first day of classes in January. The second half begins on the first day of July. Following is a table of pro rata charges:

- Start of the period through the end of third week ................. 10% charge
- Fourth week through the end of the seventh week ............... 50% charge
- Eighth week through the end of the 13th week .................. 75% charge
- Fourteenth week .................................................................. No refund

The effective date of withdrawal is determined by the Associate Vice President of Student Life. Students who believe circumstances warrant an exception from the published policy must appeal to Gerald Whittington, Senior Vice President of Business, Finance and Technology, 113 Alamance Building.

Unpaid charges owed by the student will be deducted from the calculated refund.

The $1,000 enrollment fee is nonrefundable.

**Exceptions to the institutional policy**

Students receiving Title IV financial aid and attending Elon for the first time will receive refunds as follows:

Refunds will be made to students who (a) do not register for the semester for which Title IV financial aid was intended, or (b) withdraw and do not complete the period of enrollment for which the Title IV assistance was intended. The portion of the period for which a student can receive a refund is computed by dividing the time (in weeks) remaining in the period by the total time (in weeks) of the period and rounding downward to the nearest 10 percent, less any unpaid amount owed to the university. Refunds will not be made after 60 percent of the period has been completed. Each enrollment period is considered to be 25 weeks.

Medical withdrawals will be handled on a case-by-case basis.

**DPT admissions requirements and procedures**

The DPT admissions policy at Elon is designed to select outstanding students who have demonstrated both academic ability and talent in their field. Each application is considered in light of all completed academic work, test scores, evidence of leadership and motivation, work history and credentials, letters of recommendation and a required interview.

**Admission Process**

The Elon DPT program participates in the Physical Therapist Centralized Application Service (PTCAS). All applicants will apply online using the PTCAS application. To apply, visit [ptcas.org](http://ptcas.org).
Admission Requirements

- Each applicant must complete a bachelor’s degree in the United States from a regionally accredited college or university. International degrees that have been evaluated as United States equivalent will not fulfill this requirement. All prerequisites must be completed at a regionally accredited college or university.

- Minimum GPA of 3.2 for undergraduate work

- Official transcripts of all undergraduate and any graduate studies completed or taken

- Minimum combined verbal and quantitative score of 1000 (or 297 on the revised GRE taken after 7/31/11) on the Graduate Record Examinations (GRE) taken within the last five years. A minimum of 3.0 is required for the Analytical Writing Score.

- Completion of prerequisite courses
  - Minimum of six science courses selected from the following: biology, chemistry, human anatomy/physiology, exercise psychology, kinesiology, biomechanics, pathology and/or physics
  - Minimum of one psychology course (3-credit hour course or higher)

- Grades of “C” or better are required in each prerequisite course. However, a minimum overall science GPA of 3.0 is required. No prerequisite course may be taken on a “pass/no pass” or “credit/no credit” basis; all must be transferable to Elon University.

- Three letters of recommendation:
  - One letter should be written by a practicing physical therapist
  - One letter should be from a professor/instructor who has taught you at the undergraduate or graduate level and can speak to your academic abilities
  - One other recommendation

- Personal statement

- Minimum of 100 hours volunteer or work experience in a general health care setting with at least 20 of these hours in a physical therapy acute inpatient care or hospital setting

- Must be able to meet the Essential Requirements of Physical Therapy Education at Elon University, which are detailed on our website, elon.edu/e-web/academics/dpt/essential.xhtml.

- The Test of English as a Foreign Language (TOEFL) is required unless English is the student’s native language or the language of instruction. A minimum TOEFL score of 550 (paper-based) or 213 (computer-based) or 79 (Internet-based) is required. English translations of transcripts and explanations of grading systems are required.

Exceptions to the preceding requirements may be considered under special circumstances.
Testing for DPT students: GRE

Applicants to the DPT program are required to take the Graduate Record Examinations (GRE). The GRE is a computer-based test and is available year-round at select test centers throughout the United States. Students must request the Educational Testing Service (ETS) to send GRE scores directly to PTCAS. Elon’s PTCAS code is 7617. GRE registration bulletins may be obtained from the Office of Graduate Admissions at Elon, via the Internet at gre.org or by calling 1-800-GRE-CALL.

International students

Because several months may be required to receive and process forms from international applicants, applications and complete documentation should be submitted as early as possible. The Test of English as a Foreign Language (TOEFL) is required unless English is the student’s native language or the language of instruction. A minimum TOEFL score of 550 (paper-based) or 213 (computer-based) or 79 (Internet-based) is required for admission to any graduate program at Elon. Exceptions to this requirement may be considered under special circumstances.

Requirements for International Students on F-1 Visas

In addition to DPT Admissions Requirements, F-1 students applications must include:

- Test of English as a Foreign Language (TOEFL) is required unless English is the student’s native language or the language of instruction. A minimum TOEFL score of 550 (paper-based) or 213 (computer-based) or 79 (Internet-based) is required.

- English translations of transcripts and explanations of grading systems are required if the transcripts are from institution(s) outside the United States. Original bank statement or letter issued within the last six months.

- Medical insurance and immunization records. Elon requires students to maintain health insurance during the entire period of enrollment.

Prerequisite courses

An application will be considered if the prospective student has no more than two courses — one science and one other prerequisite course — remaining to be completed during the summer or fall before enrollment. Applicants must complete all of the following courses prior to enrollment in the program. All science courses must include labs. Grades of “C” or better are required in each prerequisite course.

Science Courses (six courses)

The applicant must have six natural and/or life science courses selected from the following: biology, chemistry, human anatomy/physiology, exercise physiology, kinesiology, biomechanics, pathology and/or physics.

Psychology Course (one course)

It is preferred that this course is from the Psychology Department, but an upper-level course from another department may be acceptable.
Each science prerequisite course must have been successfully completed within 10 years prior to the registration date in January. If the 10-year limit has been exceeded, the prerequisite courses must be repeated and completed by the application deadline. However, as stated above, an applicant may have up to one science course and one other course to be taken at the time of application to the program.

Applicants are expected to demonstrate computer skills through college coursework and/or life experiences.

*Transfer credits*

Students enrolled in the DPT are not permitted to transfer credits from another graduate program. Exceptions to this policy may be permitted in rare circumstances.

*Continuation standards*

DPT students who fail to maintain a cumulative or modular grade point average of at least 3.0 will be placed on academic probation. Any student who receives a second Unsatisfactory (U) grade is subject to dismissal from the program. If a student is dismissed from the program, the student may appeal by employing the procedures for Student Appeals listed in the Elon Student Handbook. For consideration for re-admission into the program, the student must compete with the new applicants for the program.

*Graduation and degree requirements*

To earn the DPT degree, the graduate student must:

- Have an overall minimum grade point average of 3.0 in all required DPT courses.
- Submit an application for graduation to the Registrar by October 15 preceding the graduation date.
- Complete all required DPT degree courses and requirements in a satisfactory manner within five calendar years.
- Demonstrate professional entry-level competency as determined through the use of the Clinical Performance Instrument (CPI), an evaluation tool developed by the American Physical Therapy Association.

It is the student’s responsibility to be familiar with the preceding requirements for graduation.

*Graduate-level licensure*

The DPT graduate is eligible to sit for the licensure examination upon satisfactory completion of all requirements for the DPT degree.
Year I

MODULE I (4 WEEKS)

DPT 600 (4)
Psychosocial Aspects of Health Care
This course addresses the psychological and sociological effects of acute, chronic, progressive, psychiatric, terminal, traumatic, and congenital medical problems on the client, family, and therapist; the relationship of race, religion, ethnic background, gender and sexuality, medical beliefs, and language to client-/therapist interactions and to the well-being of the client; communication skills used with clients, families, and colleagues; and use of self-awareness to enhance the therapist’s therapeutic presence. Emphasis is on clinical application with active student involvement.

Unsatisfactory course grade—Remediation during the break between Modules II and III.

DPT 601 (2)
Today’s Health Care Systems
This course will introduce students to the organizational, financial, and socio-political development of the American health care system and of the physical therapy profession within that system. We will also explore the legal, ethical, and professional environments within which today’s successful physical therapist must work. Knowledge of the players, processes, parameters, principles and politics that characterize the U.S. health care system and the PT profession will provide students with the tools to be more active and influential participants in the current and future shaping of the profession, and to be more effective and productive practitioners within the U.S. health care system.

Unsatisfactory course grade—Remediation during the break between Modules II and III.

DPT 602 (1)
Principles of Teaching and Learning

Unsatisfactory course grade — Remediation at end of Year I of curriculum.

DPT 603 (604) (5)
Human Anatomy I (II)
Part I of a III module series, this course provides a comprehensive study of normal and pathological function of human movement with emphasis on the skeletal, articular, and muscular systems. Module I & II address the thorax, abdomen, spine and upper extremities. Using a regional approach, the course includes the study of clinically relevant visceral anatomy and includes the use of radiographic and some histological studies as well as surface anatomy and clinical palpation. The laboratory experience includes the study of personally dissected as well as preserved human donors. In addition, there will be inter-professional opportunities with Physician Assistant students and faculty.

Unsatisfactory course grade—No remediation; must repeat course in cycle. Re-enroll and retake course next year. WILL NOT CONTINUE IN THE CURRICULUM. WILL DELAY GRADUATION from the program.

Total Module I Credits 7

MODULE II (12 WEEKS)

DPT 603 (604) (5) (5)
Human Anatomy I (II)
Continued from Module I. DPT 603 and 604 will be coordinated with DPT 605 and 606, Human Physiology and Pathophysiology.

Unsatisfactory course grade—No remediation; must repeat course in cycle. Re-enroll and retake course next year. WILL NOT CONTINUE IN THE CURRICULUM. WILL DELAY GRADUATION from the program.

DPT 605 (606) (5) (5)
Human Physiology and Pathophysiology I (II)
Module II will focus upon normal human physiology. The normal function of major subsystems to include nervous, muscular, cardiovascular, respiratory, renal and endocrine systems as a basis for human movement and function.

Module III will focus upon how the normal human physiology is altered when pathologic conditions occur. Students will integrate information of the pathophysiology of major subsystems discussed in Module II.

DPT 605 and 606 will be coordinated with DPT 603 and 604, Human Anatomy.

Unsatisfactory course grade—No Remediation. Re-enroll and retake course next year. Student will not continue in the DPTE curriculum.

DPT 607 (3)
Physical Therapy Science I
Introduction to physical therapy skills of assessment and intervention for patient mobility including bed mobility, gait training, ambulation aids, transfers, wheelchair mobility, wheelchair and cushion selection, passive range of motion therapeutic exercises, draping, mobility management of patient with lines, leads
and tubes, and monitoring of patient’s physiologic
responses to mobility activities.

Unsatisfactory course grade—Remediation during the break between Modules II and III.

DPT 608  (2)
Physical Therapy Science II
Application of physiologic principles used with
application of hydrotherapy, superficial heat and cold,
thermal and non-thermal ultrasound in management
of patient’s injuries. Emphasis on problem solving
and clinical reasoning to determine most appropriate
interventions based upon stage of injury and patient’s
clinical signs and symptoms. Enhance skills in history
taking and commonly utilized documentation
methods. Practice skills required to maintain a sterile
environment or universal precautions.

Unsatisfactory course grade—Remediation during the break between Modules II and III.

DPT 611 (621) (3) (2)
Research Design I (II)
Review statistical and experimental procedures used
in biomedical research. Develop skills to critically
evaluate and discuss scientific literature. Participate
in a group project to identify a research topic, write
an institutional/review board application, collect and
analyze data, and make a poster presentation to the
Elon community.

Unsatisfactory course grade—Remediation during the break between Modules II and III.

DPT 612(613)(619)(703) (1) (1) (1)
Clinical Seminar I (II) (III) (IV)
Series of four clinical skills laboratory courses
throughout the DPT curriculum. Emphasis on
enhancement of student’s generic abilities, interview
skills, documentation, examination skills, intervention
strategies, utilization of evidence-based decision-
making model with justification for examination and
intervention strategies, prioritize patient problems
and identify step-wise progression of patient with
appropriate use of therapeutic exercises. Conduct
laboratory sessions in mock clinical setting (to include
broad spectrum of the continuum of care setting) where
student must balance ethical dilemmas with payment
limitations created by today’s health-care
systems. Provide opportunity for student to practice
clinical problem solving in a supportive environment.
Each course will build upon the skills from previous
modules. Early seminar courses will present simple
patient (client) cases; later courses will emphasize
the complex patient. Student expected to justify
choices and decisions about patient care in “grand
rounds” style. By the end of Seminar IV, student will
demonstrate self-confidence in clinical skills and
decision-making abilities. Goal is to prepare the
student for the contemporary world of physical
therapy. Student use of evidence-based decision
making to permeate the entire 36-month curriculum.

Unsatisfactory course grade
(612) Remediation during the break between Modules II and III.
(613) Remediation during the break between Modules III and IV.
(619) No remediation; must repeat course in cycle. Re-enroll and retake
course next year. WILL NOT CONTINUE IN THE CURRICULUM. WILL DELAY
GRADUATION from the program.
(703) Remediation during Module VII. Will delay DPT704 Clinical
Practicum II. WILL DELAY GRADUATION from the program.”

Total Module II Credits 19

MODULE III (12 WEEKS)

DPT 604  (5)
Human Anatomy II
(Continued from Modules I and II)

Unsatisfactory course grade—No remediation; must repeat course in
cycle. Re-enroll and retake course next year. WILL NOT CONTINUE IN THE
CURRICULUM. WILL DELAY GRADUATION from the program.

DPT 606  (5)
Human Physiology and Pathophysiology II
(Continued from Module II)

Unsatisfactory course grade—No remediation; must repeat course in
cycle. Re-enroll and retake course next year. WILL NOT CONTINUE IN THE
CURRICULUM. WILL DELAY GRADUATION from the program.

DPT 609  (3)
Physical Therapy Science III
Basic skills of goniometry, manual muscle testing and
postural evaluation to measure impairment.

Unsatisfactory course grade—Remediation during the break between
Modules III and IV.

DPT 610  (2)
Human Motor Development
This module examines the early attainment of
movement and the developmental changes in
body structures and systems which impact motor
skill acquisition. Emphasis is placed on early system
changes however lifespan comparisons are introduced.
Typical motor development is presented in terms
of the relationships that motor performance has
with growth and maturation of the musculoskeletal,
neurological, physiological, and sensory systems.
Classroom & lab work bring to light the diversity of
development among individuals and cultures.

Unsatisfactory course grade—Remediation during the break between
Modules III and IV.
DPT 613  Clinical Seminar II (III) (IV)  
Second seminar in series of four. See course description in Module II.  
Unsatisfactory course grade—Remediation during the break between Modules III and IV.

DPT 614  Foundations of Biomechanics and Musculoskeletal Management  
Basic concepts of biomechanics and musculoskeletal management are presented to prepare the student for application to specific regional problems in Module IV, 3 courses: DPT 616, 617, 618. Biomechanics and Management of Musculoskeletal Dysfunction I, II, and III. Principles of biomechanics (kinematics and kinetics) and functional characteristic of bone, connective tissue, and skeletal muscle are presented to develop a conceptual framework for discussion and application to human motion. Content includes an introduction to musculoskeletal physical therapy and the steps of patient/client management to include: history, tests and measures, diagnosis, prognosis, and physical therapy intervention. The foundational concepts are supported by an introduction to a clinical reasoning process informed by current best practice and utilized throughout the musculoskeletal module.  
Unsatisfactory course grade—No remediation; must repeat course in cycle. Re-enroll and retake course next year. WILL NOT CONTINUE IN THE CURRICULUM. WILL DELAY GRADUATION from the program.

DPT 619  Clinical Seminar III (IV)  
Third seminar in series of four. See course description in Module II.  
Unsatisfactory course grade—No remediation; must repeat course in cycle. Re-enroll and retake course next year. WILL NOT CONTINUE IN THE CURRICULUM. WILL DELAY GRADUATION from the program.

DPT 620  Clinical Imaging  
Elements of reading roentgenographs, CAT and MRI scans for the physical therapist to enhance patient interventions.  
Unsatisfactory course grade—Remediation during Module V. WILL DELAY DPT700 Clinical Practicum I. WILL DELAY GRADUATION from the program.

DPT 621  Research Design II  
(Continued from Module III, Research Design I)  
Unsatisfactory course grade—Remediation during Module V. WILL DELAY DPT700 Clinical Practicum I. WILL DELAY GRADUATION from the program.

DPT 616, 617, 618  Biomechanics and Management of Musculoskeletal Dysfunction I-III  
Biomechanics and patient/client management of musculoskeletal dysfunction will be approached regionally and sequenced proximal to distal during the progression of three courses. Content includes joint mechanics and functional anatomy (arthrokinematic and osteokinematic motion), common pathologies/dysfunctions and management of those problems to include patient/client history, documentation, systems review, tests and measures, diagnosis, prognosis and intervention. Diagnostic imaging and pharmacology integrated into three courses. An analysis of total body movement as well as individual joints is utilized to assist understanding of biomechanics and orthopedic management.  
Unsatisfactory course grade—No remediation; must repeat course in cycle. Re-enroll and retake course next year. WILL NOT CONTINUE IN THE CURRICULUM. WILL DELAY GRADUATION from the program.

DPT 622  Therapeutic Pharmacokinetics  
Effects of commonly used drugs in patients with physical disability; side effects that alter physical performance or responses to exercise.  
Unsatisfactory course grade—Remediation during Module V. WILL DELAY DPT700 Clinical Practicum I. WILL DELAY GRADUATION from the program.

Total Module III Credits 20

MODULE IV (18 WEEKS; INCLUDING ONE WEEKLONG BREAK)

DPT 616, 617, 618  Biomechanics and Management of Musculoskeletal Dysfunction I-III  
Biomechanics and patient/client management of musculoskeletal dysfunction will be approached regionally and sequenced proximal to distal during the progression of three courses. Content includes joint mechanics and functional anatomy (arthrokinematic and osteokinematic motion), common pathologies/dysfunctions and management of those problems to include patient/client history, documentation, systems review, tests and measures, diagnosis, prognosis and intervention. Diagnostic imaging and pharmacology integrated into three courses. An analysis of total body movement as well as individual joints is utilized to assist understanding of biomechanics and orthopedic management.  
Unsatisfactory course grade—No remediation; must repeat course in cycle. Re-enroll and retake course next year. WILL NOT CONTINUE IN THE CURRICULUM. WILL DELAY GRADUATION from the program.

Total Module IV Credits 24

Year II

MODULE V (8 WEEKS)

DPT 700  Clinical Practicum I  
This first 8-week, full-time clinical education requirement integrated into the 3-year DPT curriculum is designed to provide the student with the opportunity to apply knowledge and skills acquired during Year I. Clinical practice settings will be selected so the student meets the outpatient/ambulatory care setting, and musculoskeletal patient diagnoses
requirements as defined in the APTA Guide to Physical Therapist Practice.

Unsatisfactory course grade — Must retake course during Module VII or VIII. May require remediation prior to retaking the course. Will DELAY GRADUATION from the program.

**Total Module V Credits**  4

**MODULE VI (16 WEEKS)**

**DPT 701**  
Neuroscience  
Anatomy and physiology of the human nervous system; development, cellular, chemical, and structural basis for normal and abnormal sensorimotor and higher cognitive function. Discusses the clinically relevant pathological sequelae and the neurobiological basis for clinical intervention. Emphasizes a highly organized and interconnected nervous system with multiple mechanisms of neuroplasticity. Neuroimaging is integrated into the course.  
Unsatisfactory course grade — Remediation during Module VII. WILL DELAY DPT704 Clinical Practicum II. WILL DELAY GRADUATION from the program.

**Total Module VI Credits**  23

**MODULE VII (8 WEEKS)**

**DPT 704**  
Clinical Practicum II  
This second eight-week, full-time clinical education requirement integrated into the three-year DPT curriculum is designed to provide the student with the opportunity to apply knowledge and skills acquired during Year I and II. Clinical settings will be selected so the student meets the Acute Care or Rehabilitation settings, and/or neuromuscular patient diagnoses requirements as defined in the APTA Guide to Physical Therapist Practice.  
Unsatisfactory course grade — Must retake the course during Module VIII. May require remediation prior to retaking the course. WILL DELAY GRADUATION from the program.

**Total Module VII Credits**  4

**MODULE VIII (8 WEEKS)**

**DPT 711**  
Clinical Practicum III  
This third eight-week, full-time clinical education requirement integrated into the three-year DPT curriculum is designed to provide the student with the opportunity to apply knowledge and skills acquired during Year I and II. Clinical settings will be selected so the student meets the Acute Care or Rehabilitation settings, and/or neuromuscular patient diagnoses requirements as defined in the APTA Guide to Physical Therapist Practice.  
Unsatisfactory course grade — Must Retake the course during Module XIII (Internship Module). May require remediation prior to retaking the course. WILL DELAY GRADUATION from the program.

**Total Module VII Credits**  4

**Year III**

**MODULE IX (15 WEEKS; INCLUDING THREE WEEKLONG BREAKS)**

**DPT 705**  
Principles of Electrotherapeutic Examination and Intervention; Management of Integumentary Disorders  
Basic concepts in electrical safety and instrumentation, detailed concepts and applications of electrotherapy introducing principles of electrophysiologic
testing and therapeutic application of electrical stimulation (ES), including strengthening (NMES), re-education, pain reduction (TENS), tissue repair (ESTR) and iontophoresis. Electrophysiologic testing to include an introduction to electromyography (EMG), nerve conduction velocity (NCV) and other electrophysiological tests. Systematic problem-solving approach to integumentary disorders with emphasis on etiology, pathophysiology, examination techniques and approaches, clinical signs and symptoms, multidisciplinary considerations, and evidence-based treatment approaches.

Unsatisfactory course grade – Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

DPT 706 (5)
Physiology of Exercise

Human physiologic responses to exercise including changes and adaptations in cardiopulmonary, musculoskeletal and neuromuscular systems across the life span, including normal response and response of those with special needs. Exercise training principles explored through case presentations laboratory experiences, class discussion and lecture. Basic nutrition principles taught in relationship to exercise.

Unsatisfactory course grade – Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

DPT 707 (4)
Management of Cardiopulmonary Dysfunction

Cardiac and pulmonary pathophysiology of patients to include physical therapy management of clients, laboratory and lecture.

Unsatisfactory course grade – Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

DPT 708 (3)
Prosthetics and Orthotics

Examination and intervention through application of prosthetic and orthotic devices for patients (clients). Analysis of gait patterns created through use of prosthetic and orthotic devices; includes laboratory.

Unsatisfactory course grade – Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

DPT 709 (1)
Directed Research I

Guided instruction in the discussion and presentation of peer reviewed research. Students will gain experience, practice and comfort discussing relevant research and the application of research to clinical practice.

Unsatisfactory course grade – Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

Total Module VIII Credits 18

MODULE X (4 WEEKS)

DPT 800 (4)
Clinical Decision Making with Complex Patient (Client)

Role of physical therapy in rehabilitation of client with complex and/or multiple problems of the neurologic, musculoskeletal, and/or cardiopulmonary systems will be emphasized. Emphasis will be placed on clinical problem solving to obtain the desired functional outcome for the client. Guided instruction will assist the student in making appropriate clinical decisions regarding examination, interventions with emphasis on functional outcomes, and clinical decisions to progress the patient with relevant therapeutic exercise programs. Evidence-based research will be used to determine interventions. Video-recorded client case presentation will follow the patient through the numerous levels of care including intensive care to home care.

Unsatisfactory course grade – Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

DPT 801 (4)
Management of the Pediatric Client

This course provides the learner with a systematic, problem solving approach to the pediatric client with emphasis on prevention, examination, evaluation, diagnosis/prognosis, outcomes and interventions. The course will identify central issues related to therapeutic intervention for children and their families; includes laboratory.

Unsatisfactory course grade – Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

Total Module X Credits 8

MODULE XI (4 WEEKS)

DPT 802 (4)
Principles of Administration and Management

Whether functioning as a staff employee or administrator in a hospital or health care agency or
as an independent contractor in the private sector, the Doctor of Physical Therapy must be prepared to address issues associated with the practice of physical therapy as business enterprise within the U.S. health care system. Knowledge and skills associated with administrative and managerial aspects of professional PT practice will be essential for functioning as an effective employee, supervisor, or entrepreneur. This course is designed to teach fundamental administrative and managerial skills and knowledge essential for planning and operating a PT business practice or department. Possession of such skills and knowledge will enable graduates to more effectively engage in professional practice as cooperative, collaborative, and contributing employees or as effective and financially successful private practitioners.

Unsatisfactory course grade—Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

DPT 803 Geriatric Health and Wellness
Holistic approach to the geriatric client as an active participant in the health care process. Specific attention is given to the aging process, preventive care, management of pathological aging, and possibilities for the future of geriatric physical therapy.

Unsatisfactory course grade—Remediation before Module XIII (Internship). May delay DPT 805 internship. May delay graduation from the program.

| Total Module XI Credits | 8 |

| MODULE XII (6 WEEKS) |

DPT 804 Advanced Clinical Practice Selective Tracks
Continued study in selected topic areas including the broad spectrum of primary clinical practice settings. Generally, students focus on 1 of 3 areas: musculoskeletal, neuromuscular rehabilitation or research. Much of the course will be taught in a mock clinical setting with patients/clients for musculoskeletal and neuromuscular tracks and in a laboratory-based or field work setting for research track. Topics included may vary from year to year. Emphasis will be on continued development of clinical and research skills to prepare students for today’s demanding health care environment. In lieu of continued study in 1 of 3 areas, students may request an independent study in physical therapy. Request will be generated by the student through a faculty sponsor. Requires advanced approval (by the beginning of Year III of the DPT curriculum) of the course faculty.

Unsatisfactory course grade—Remediation during Module XIII. WILL DELAY DPT 805 Internship. WILL DELAY GRADUATION from the program.

| Total Module XII Credits | 12 |

| MODULE XIII (24 WEEKS) |

DPT 805 Internship
This six-month (24 weeks full-time clinical Internship is designed to provide students with the opportunity for integration of all didactic knowledge, and clinical competency development to reach entry-level clinical performance. The Internship is designed to integrate critical inquiry, administration, education and consultation into all aspects of patient/client management.

Unsatisfactory course grade—Must retake the course. May require remediation prior to retaking the course. WILL DELAY GRADUATION from the program.

DPT 809 Directed Research II
Guided instruction in the development, planning, and writing of a case report. Final submission will be “publication ready.”

Unsatisfactory course grade—will need to remediate the course. WILL DELAY GRADUATION from the program.

| Total Module XIII Credits | 13 |

| MODULE XIV |

Electives
Students are offered a selected topic presented in the style of a continuation education course. Also, a licensure review course is presented. Participation in Electives week is required.
**Administration**

Leo M. Lambert, B.A., M.Ed., Ph.D.  
President

Steven D. House, B.S., Ph.D.  
Provost and Executive Vice President

Elizabeth A. Rogers, B.S., M.Ed., Ed.D.  
Dean of the School of Health Sciences and Professor of Physical Therapy

Arthur W. Fadde, B.S., M.Ed.  
Associate Dean of Admissions and Director of Graduate Admissions

**Faculty**

Stephen E. Folger, Chair/Program Director of the Department of Physical Therapy Education and Professor of Physical Therapy  
B.S., Ithaca College; Ph.D., The University of North Carolina at Chapel Hill

Addison Williams Andrews, Associate Professor of Physical Therapy  
B.S. in Physical Therapy, The University of North Carolina at Chapel Hill; M.S., The University of North Carolina at Chapel Hill; Ed.D., North Carolina State University; Clinical Specialist in Neurologic Physical Therapy

Stephen P. Bailey, Professor of Physical Therapy  
B.A., Western Maryland College; B.S., Medical University of South Carolina; M.A., Wake Forest University; Ph.D., University of South Carolina; Fellow, American College of Sports Medicine

Carrie Ann Brice, Assistant Professor of Physical Therapy  
B.S., M.S., D’Youville College; DPT, C.W.S., Elon University

Susan A. Chinworth, Associate Professor of Physical Therapy  
B.S., Washington University; M.S., University of North Texas; Ph.D., Texas Woman’s University

Janet M. Cope, Associate Professor of Physical Therapy  
B.S., University of New Hampshire; M.A., Springfield College; M.A., University of Massachusetts at Amherst; Ph.D., University of Massachusetts at Amherst

Paula DiBiasio, Assistant Professor of Physical Therapy  
B.S., Northeastern University; M.S., The University of North Carolina at Chapel Hill; DPT, Massachusetts General Hospital Institute of Health Professions

Beth Evans, Assistant Professor of Physical Therapy  
B.S., Rhodes College; M.A. & Ph.D., The University of North Carolina at Chapel Hill

Jane Freund, Associate Professor of Physical Therapy  
B.S., East Stroudsburg State College; MPT, U.S. Army – Baylor University; M.S., The University of North Carolina at Chapel Hill; DPT, Arizona Health Sciences University; Clinical Specialist in Neurologic Physical Therapy

Wendy Herbert, Assistant Professor of Physical Therapy and Director of Clinical Education  
B.S., M.S. & Ph.D., The Ohio State University

Johanna Janssen, Associate Professor of Physical Therapy and Assistant Director of Clinical Education  
B.S., Jan van Essen Academy; M.S., United States Sports Academy; Ed.D., Nova Southeastern University

Charity Johansson, Professor of Physical Therapy  
B.A., Wake Forest University; M.A., Stanford University School of Medicine; Ph.D., The University of North Carolina at Chapel Hill; Clinical Specialist in Geriatric Physical Therapy

Daryl Lawson, Associate Professor of Physical Therapy  
B.S., Central Michigan University; M.P.T., University of Southern California; DSc., Loma Linda University

Elisabeth Pennington, Assistant Professor of Physical Therapy  
B.A., North Carolina State University; M.A., The University of North Carolina at Greensboro; C.C.C. – Speech-Language Pathology

Deborah M. Stetts, Associate Professor of Physical Therapy  
B.S., Pennsylvania State University; M.P.T., U.S. Army - Baylor University; M. Strategic Studies - U.S. Army War College; DPT, A.T. Still University; Clinical Specialist in Orthopaedic Physical Therapy; Fellow in American Academy of Orthopaedic Manual Physical Therapy
Srikant Vallabhajosula, B.E., M.S., Ph.D.
  B.E., Osmania University; M.S., University of Cincinnati; Ph.D., University of Florida

Robin Waldron, Assistant Professor of Physical Therapy
  B.S., East Carolina University; DPT, Elon University

**Staff**

Gytis Balilionis, Ph.D, Laboratory Coordinator
Brenda Junious, Program Assistant in Clinical Education
Dianne Little, Program Assistant
Nita Skillman, Clients and Standardized Patient Coordinator
