

Blue Cross Blue Shield of North Carolina Enhanced 4 Tier Formulary

Please consider talking to your doctor about prescribing formulary medications, which may help reduce your out-of-pocket costs. This list may help guide you and your doctor in selecting an appropriate medication for you.

The medication formulary is regularly updated. Please visit bcbsnc.com for the most up-to-date information.

Member guide to commonly prescribed medications on the Enhanced Formulary

This guide lists the approved brand name and generic prescription medications that have been reviewed by Blue Cross and Blue Shield of North Carolina (Blue Cross NC). Please refer to this formulary guide for information about medications covered by this formulary, and present this guide to your doctor if you require a prescription. **This guide was current at the time of printing and is subject to change.**

The prescription medications listed in the formulary or their tier placement may change from time to time due to a change in the cost of the medication and/or in the classification of the medication by the U.S. Food and Drug Administration (FDA) or nationally-recognized medication databases (e.g., Medispan). For a more complete listing of medication coverage and costs, you may use our medication search at www.bcbsnc.com. You may also call Blue Cross NC Customer Service at the number listed on the back of your ID card to verify prescription medication benefits.

A formulary is a list of prescription medications covered by a health plan. Blue Cross NC Pharmacy & Therapeutics (P&T) Committee reviews medications at least quarterly. This includes ongoing reviews of clinical information about new medications and reviews of new safety and efficacy information about older medications. The majority of Blue Cross NC's P&T Committee is composed of practicing physicians and pharmacists independent of Blue Cross NC.

Tier placement of prescription medications in the formulary may be determined by: the effectiveness and safety of the medication, the cost of the medication, and /or the classification of the medications by the U.S. Food and Drug Administration (FDA) or nationally-recognized medication databases (e.g., Medispan).

Please refer to your member guide for detailed information regarding your pharmacy benefits, including your benefit design, out-of-pocket costs, prior review and restricted access medication requests, and applicable exclusions.

Enhanced Formulary tiers

The 3-Tier and 4-Tier Formularies cover most medications approved by the United States Food & Drug Administration (FDA), within existing benefits. The plan design determines the member's payment obligation. Some members have a two-tiered benefit structure (Tier 1 and Tier 2), some members have a three-tiered benefit structure (Tier 1, Tier 2, and Tier 3), and some members have a four-tiered benefit structure (Tier 1, Tier 2, Tier 3, and Tier 4) depending on the plan in which they are enrolled.

4-Tier Formulary

Definitions for a four-tiered benefit structure:

- **Tier 1:** The prescription medication tier which consists of the lowest cost tier of prescription medications, most are generic.
- **Tier 2:** The prescription medication tier which consists of medium-cost prescription medications, most are generics, and some brand-name prescription medications.
- **Tier 3:** The prescription medication tier which consists of higher-cost prescription medications, most are brand-name prescription medications, and some specialty medications.
- **Tier 4:** The prescription medication tier which consists of the highest-cost prescription medications, most are specialty medications.

3-Tier Formulary

Definitions for a three-tiered benefit structure:

- **Tier 1:** The prescription medication tier which consists of the lowest cost tier of prescription medications, most are generic.
- **Tier 2:** The prescription medication tier which consists of medium-cost prescription medications, most are generics, and some brand-name prescription medications.
- **Tier 3:** The prescription medication tier which consists of higher-cost prescription medications, most are brand-name prescription medications, and some specialty medications.

2-Tier Formulary

Definitions for a two-tiered benefit structure:

- Tier 1
- Tier 2, Tier 3, Tier 4

Generic medications

In most cases choosing a generic medication equivalent, when available, may mean significant savings to you. We encourage you to discuss with your physician whether a generic alternative is available as these medications represent safe, effective treatment options. Especially for medications that are taken daily and refilled frequently, you will experience the long-term savings of a lower medication co-payment month after month. **For some benefit plans, if you choose a brand name prescription medication and a generic equivalent is available, you may be subject to a reduced benefit and a higher out-of-pocket expense.**

Compounded prescriptions

Compounded prescriptions contain two or more medications mixed together. Compounded prescriptions are processed according to member benefits. To be eligible for coverage, compounded medications must contain at least one ingredient that is defined as a prescription medication and must not be a copy of a commercially available product. Compounded medications may be subject to prior review and benefit exclusion.

Prior review, quantity limitations and restricted-access medications

Under some benefit plans, certain medications may be subject to prior review, quantity limitations, or restricted-access programs. BCBSNC's P&T Committee reviews the clinical criteria for these programs.

Criteria – This tells you what conditions you have to meet for a medication to be covered under your benefits. Some of this may be technical medical information, but it's available for you to read and discuss with your provider. Criteria is available at the following website: www.bcbsnc.com/content/services/formulary/rxnotes.htm.

The different types of review:

- Prior Review (PA)*: Your provider needs to review our clinical criteria and confirm that you meet the requirements.
- Quantity Limitations (QL)*: Your provider needs to review our clinical criteria and confirm that you meet the requirements for the amount requested. You can still receive the medication without our review and approval, just not over a set amount.
- Restricted Access/Step Therapy (RA/ST)*: Your provider needs to confirm that you have tried specific, non-restricted medication(s) first and that it was ineffective or harmful to you in the past (and the provider believes it will be ineffective or harmful again). You need to have this done before you can receive the other restricted medication.

*Please see "Covered Services" and "Glossary" in your benefit booklet for more information.

PLEASE NOTE: If you change your health plan, your provider may need to tell us again that you have met our clinical criteria under your new plan.

The FDA is responsible for approving medications for use based on clinical data proving the medication is safe and effective for that specific use. Blue Cross NC's prior review and quantity limitations programs follow FDA-approved uses for these medications. However, Blue Cross NC recognizes that in many cases, "off-label" (non-FDA approved) uses of prescription medications may be acceptable. In determining the acceptability of off-label uses, Blue Cross NC utilizes several sources of clinical information including but not limited to 1) nationally recognized clinical references including American Hospital Formulary Service Medication Information; 2) the results of at least two randomized controlled clinical studies that support a specific off-label use, and that are published in peer-reviewed professional medical journals; and 3) consultations with internal and external physician experts regarding community standards. Additional searches for current supporting medical literature may be performed utilizing standard electronic databases.

Specialty medications

These medications, as classified by Blue Cross NC, generally have unique uses, require special dosing or administration, are typically prescribed by a specialist provider and are significantly more costly than alternative medications or therapies. Most specialty medications can be found on Tier 4, but some may be found on a lower tier. Some of these specialty medications will need to be filled at a participating specialty pharmacy in our network. These medications are identified in the specialty column of the formulary guide. Call the customer service number on the back of your Blue Cross NC ID card to determine which pharmacy can fill your specialty medication prescription.

Affordable Care Act

Please note, some medications may have limited or \$0 cost-sharing under the Affordable Care Act (ACA); examples of categories of medications that may be subject to limited or \$0 cost share include aspirin, breast cancer preventive, fluoride supplements, folic acid supplements, gonorrhea prophylaxis (newborn), iron supplements, tobacco cessation, immunizations (influenza, shingles and pneumonia are covered in-network), vitamin D supplements, and some contraceptive medications and devices. You may find additional information about these medications at: www.bcbsnc.com/preventive. These medications are identified in the ACA column of the formulary guide. If you do not find the medication you are searching for, consult or contact the customer service number on the back of your ID card to find out if the medication is available over the counter or is covered under your medical benefit.

Limited Distribution medications

Limited Distribution medications (LD) are medications where the manufacturer chooses to limit the distribution of the medication to only a few pharmacies, or the Food and Drug Administration (FDA) requires this restriction during the medication approval process. This type of restricted distribution helps the manufacturer keep track of medication inventory and ensure that special dosing or lab monitoring requirements are followed to minimize any risks associated with the LD medication. Medications which have restrictions on where the member may obtain them are identified in the LD column of the formulary guide.

Using the member guide to the Enhanced Formulary

The Medication List is organized into broad categories (e.g., ANTI-INFECTIVE AGENTS). The graphic below shows the information that is provided in each column of the medication list and is an example only. Please use the medication search function to find current information for medications on the medication list.

1 Drug Name	2 Drug Tier	3 Specialty	4 Prior Review	5 Restricted Access	6 Quantity Limits	7 ACA	8 Limited Distribution
sulfamethoxazole-trimethoprim tab 400-80 mg (Bactrim)	1						
sulfamethoxazole-trimethoprim tab 800-160 mg (Bactrim ds)	1						
tinidazole tab 250 mg	1						
tinidazole tab 500 mg (Tindamax)	1						
trimethoprim tab 100 mg	1						
vancomycin hcl cap 125 mg (Vancocin hcl)	1						
vancomycin hcl cap 250 mg (Vancocin hcl)	1						
ANTINEOPLASTIC AGENTS							
AFINITOR - everolimus tab 2.5 mg	4	•	•		•		•
AFINITOR - everolimus tab 5 mg	4	•	•		•		•
AFINITOR - everolimus tab 7.5 mg	4	•	•		•		•
AFINITOR - everolimus tab 10 mg	4	•	•		•		•

- 1 The first column of the chart lists the medication name. Generic medications are listed in lowercase **boldface**. Brand name medications are capitalized.
Separate medication entries are required for some dosage forms such as extended-release and delayed-release.
- 2 The second column indicates the Tier level.
Note: If a medication displays an "A" in the Medication Tier column, this indicates the medication may only be covered if a member meets the criteria for \$0 copay under the Affordable Care Act.
- 3 The third column indicates if the medication is a Specialty medication and needs to be filled at a participating specialty pharmacy in our network.
- 4 The next three columns indicate the Pharmacy Program(s) that apply to the prescription medication (e.g., Prior Review, Restricted Access and Quantity Limitations). If an indicator is present in the column(s), then the Pharmacy Program applies.
- 5 The seventh column indicates if the medication may have limited or \$0 cost-sharing under the Affordable Care Act (ACA). Benefits may apply.
- 6 The last column indicates if the medication is considered Limited Distribution.
